Enhance your Decision-Making Skills

with Analytics and AI

Conventional M.Sc. in Business Analytics program
with a focus on functional specialization are a passé.

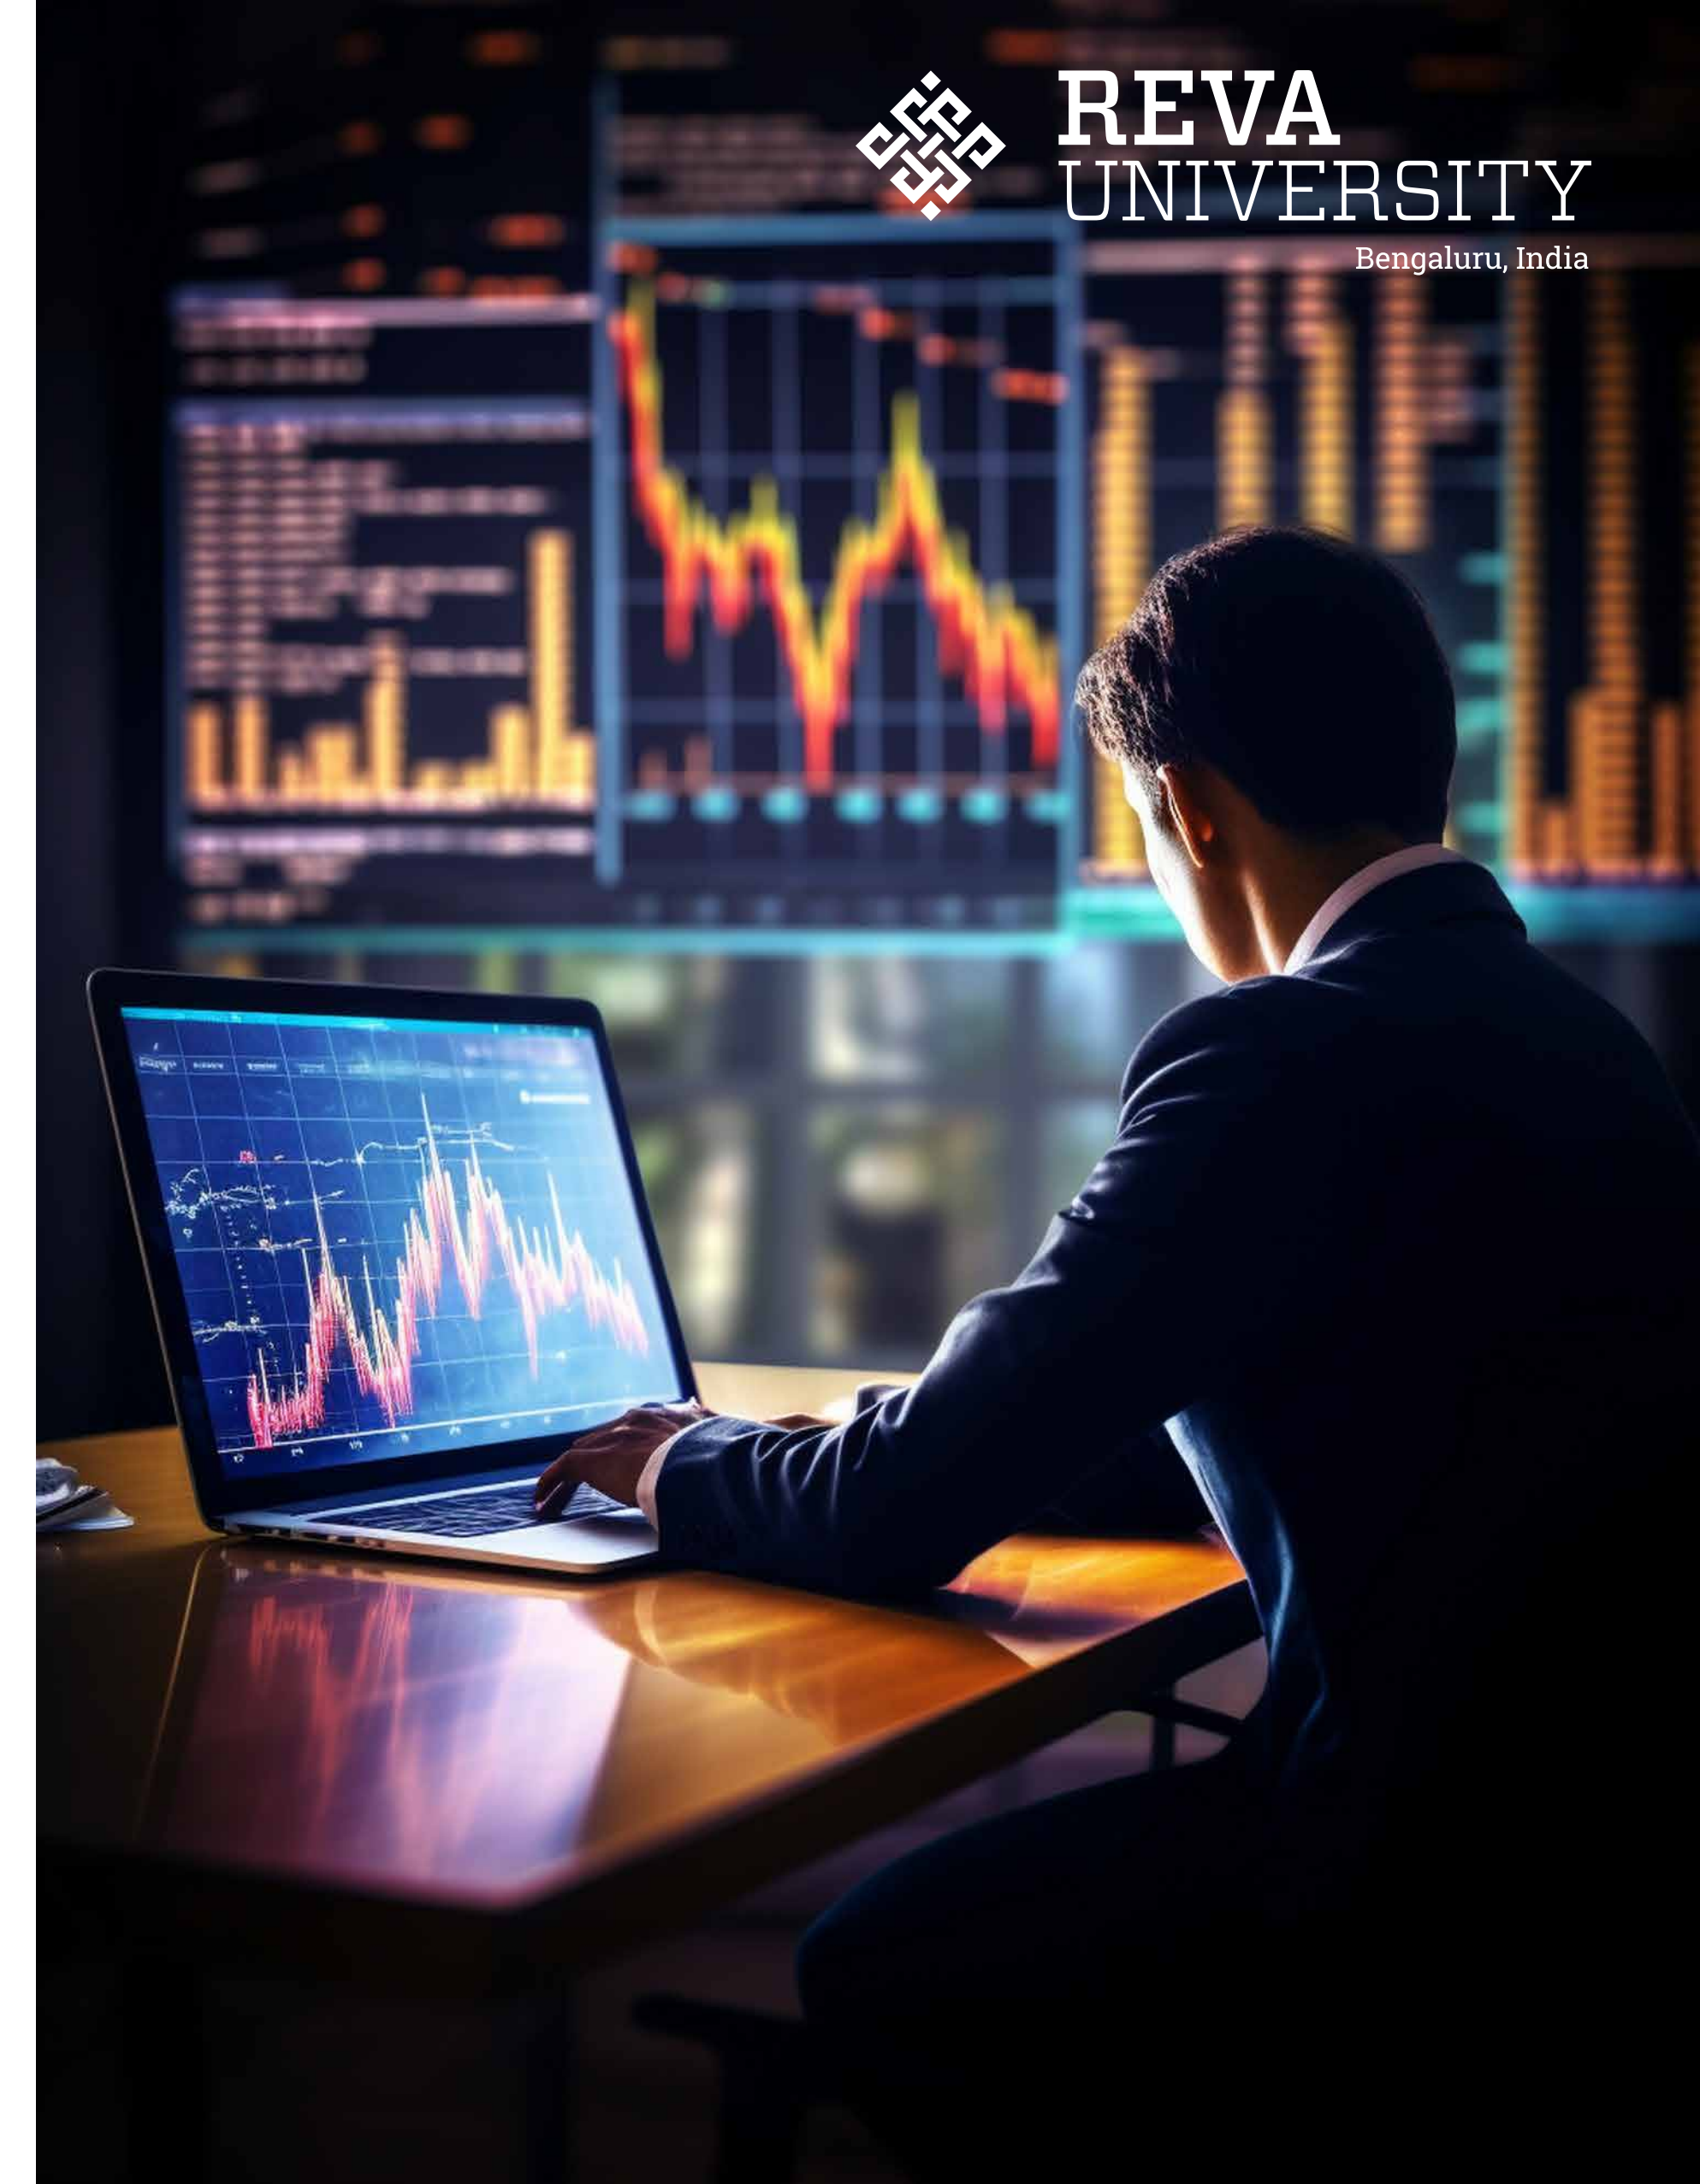

Foreword

In today's post-pandemic world, organizations and leaders are facing new and complex challenges. Intense competition, globally spread diverse workforce, digital media explosion, discerning customers along with Covid induced work challenges, to pick a few. However, each of these challenges brings a world of possibilities and opportunities. What one needs to stay competitive is a new set of toolkits, skills, and an undying passion to learn, unlearn, and relearn.

**Data is now
the new electricity,**
all decisions need to be
powered by data.

For business leaders and professionals, data-driven decision-making skills are not a choice anymore, it is a bare minimum requirement. Today, Machine Learning and Artificial Intelligence power all the business functions, processes, products, and projects of an organization. To build a successful career and create sustainable organizations one needs to build the skills to harness the humongous amount of data available within and outside the organization.

A bespoke M.Sc. powered by Analytics and Data Science, designed by industry thought leaders and delivered by REVA Academy for Corporate Excellence. RACE, REVA University helps you fast track your career journey to the top echelons of organizations of tomorrow.

Five Reasons to Choose M.Sc. in Business Analytics

REVA
UNIVERSITY
Bengaluru, India

Leaders wanted: Techno-Functional, Performance-Driven,
Empathetic, Responsible. Become One.

Five Reasons to Choose M.Sc. in Business Analytics

01 Develop Full-Stack Analytics and Decision-making Skills

This unique program will help the learner to design data-driven processes and systems, **build descriptive, diagnostic, predictive, prescriptive, and cognitive models**, deploy and monitor them in a real-time business setting.

02 Designed for Creating Enterprise Leaders

This program is designed to **help enterprise leaders who can harness the web of information from internal functions and external sources into meaningful decisions**, to build profitable and sustainable organizations. Modules like Enterprise Analytics and Consulting in Analytics build end-to-end performance-driven skillsets.

03 Building Techno-Functional Expertise

A well-balanced program curriculum ensures that the learner **gains deep technical and functional expertise in building Machine Learning/Deep Learning-based applications in all the enterprise functions** based on the business challenges, thus making a very strong resume with hands-on skills which is a rarity today.

04 Active Learning with Industry-grade Projects

At the end of this two-year M.Sc. in Business Analytics program, the learners will get to work on **10+ plus mini-projects, 2 plus full-scale projects, and research publication(s)**. These projects are mentored by industry thought leaders and hence career transformational. The main focus of these projects is on research and innovation, range from business use cases to cutting-edge deep learning product development.

05 Lateral Placement with Career Guidance and Support

A wide network of **50 plus industry mentors, 100 plus marquee organizations as placement partners, and 1000 plus strong alumni network** ensure a successful transition of our learners into analytics managers. The lateral placement process is uniquely designed with one-on-one career guidance and mentoring sessions, resume building support, special training, and mock interviews, to place each learner nationally and internationally with an average of 50 to 200% increase in salary.

Become an Analytics Consultant with Deeper Techno-Functional Skills

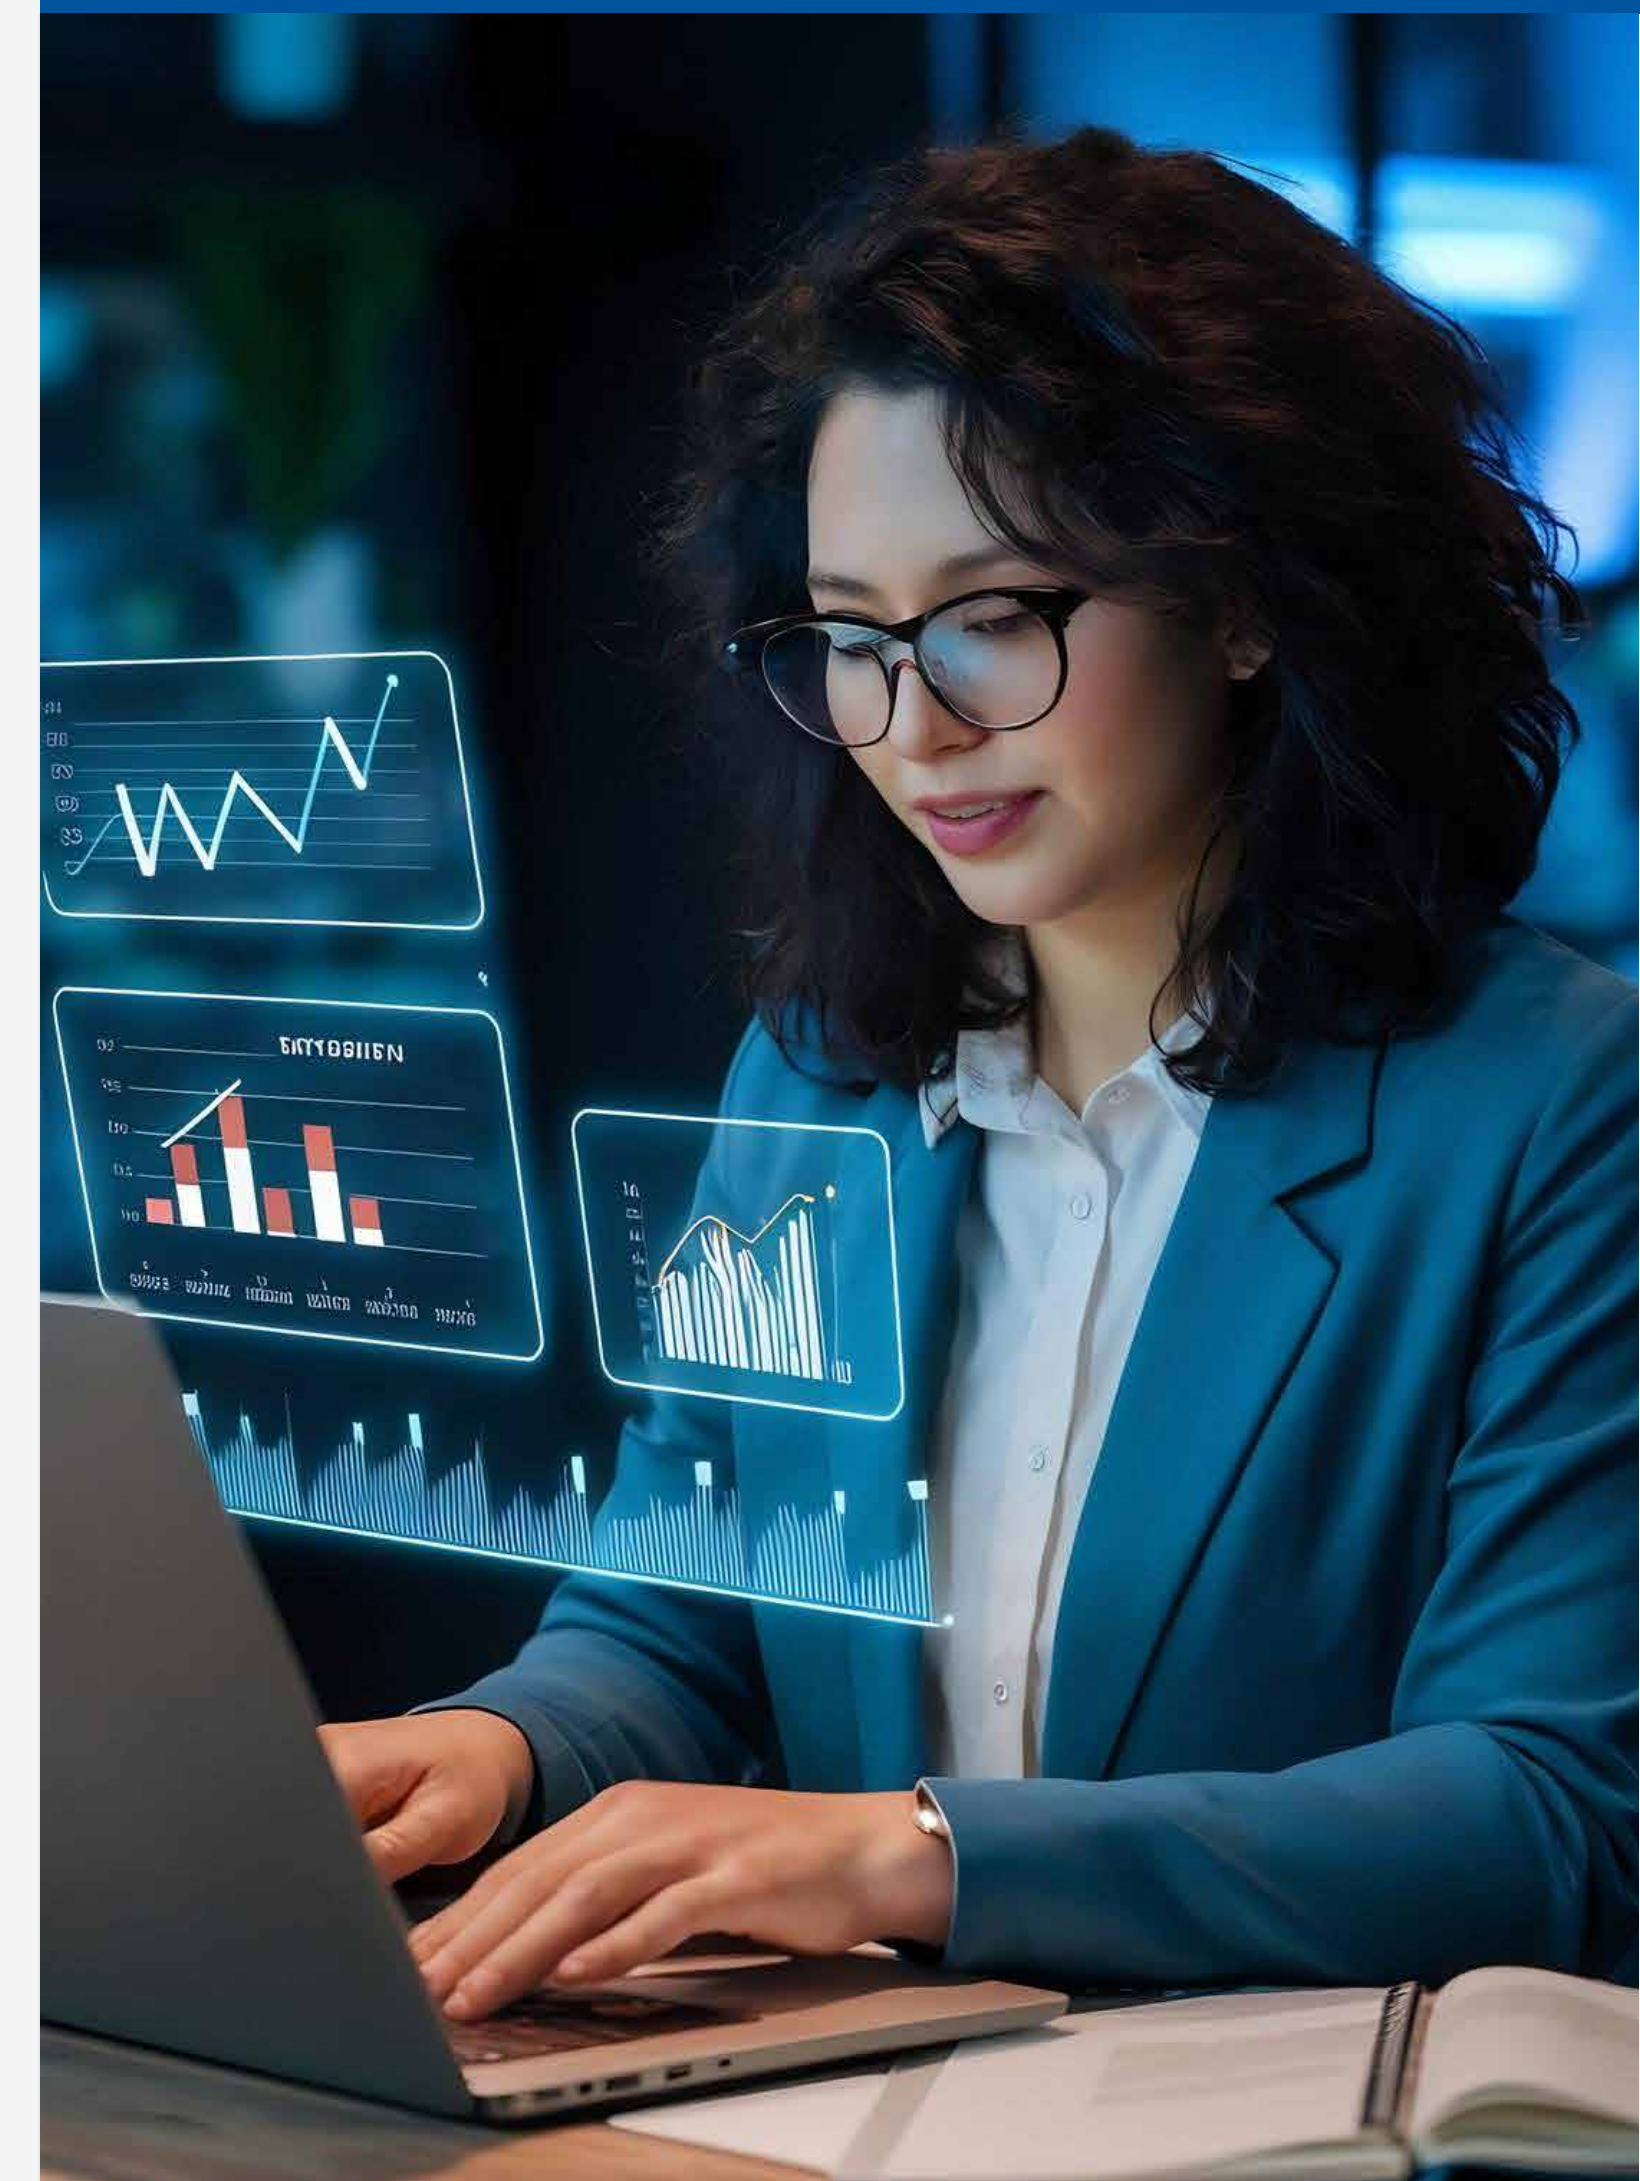

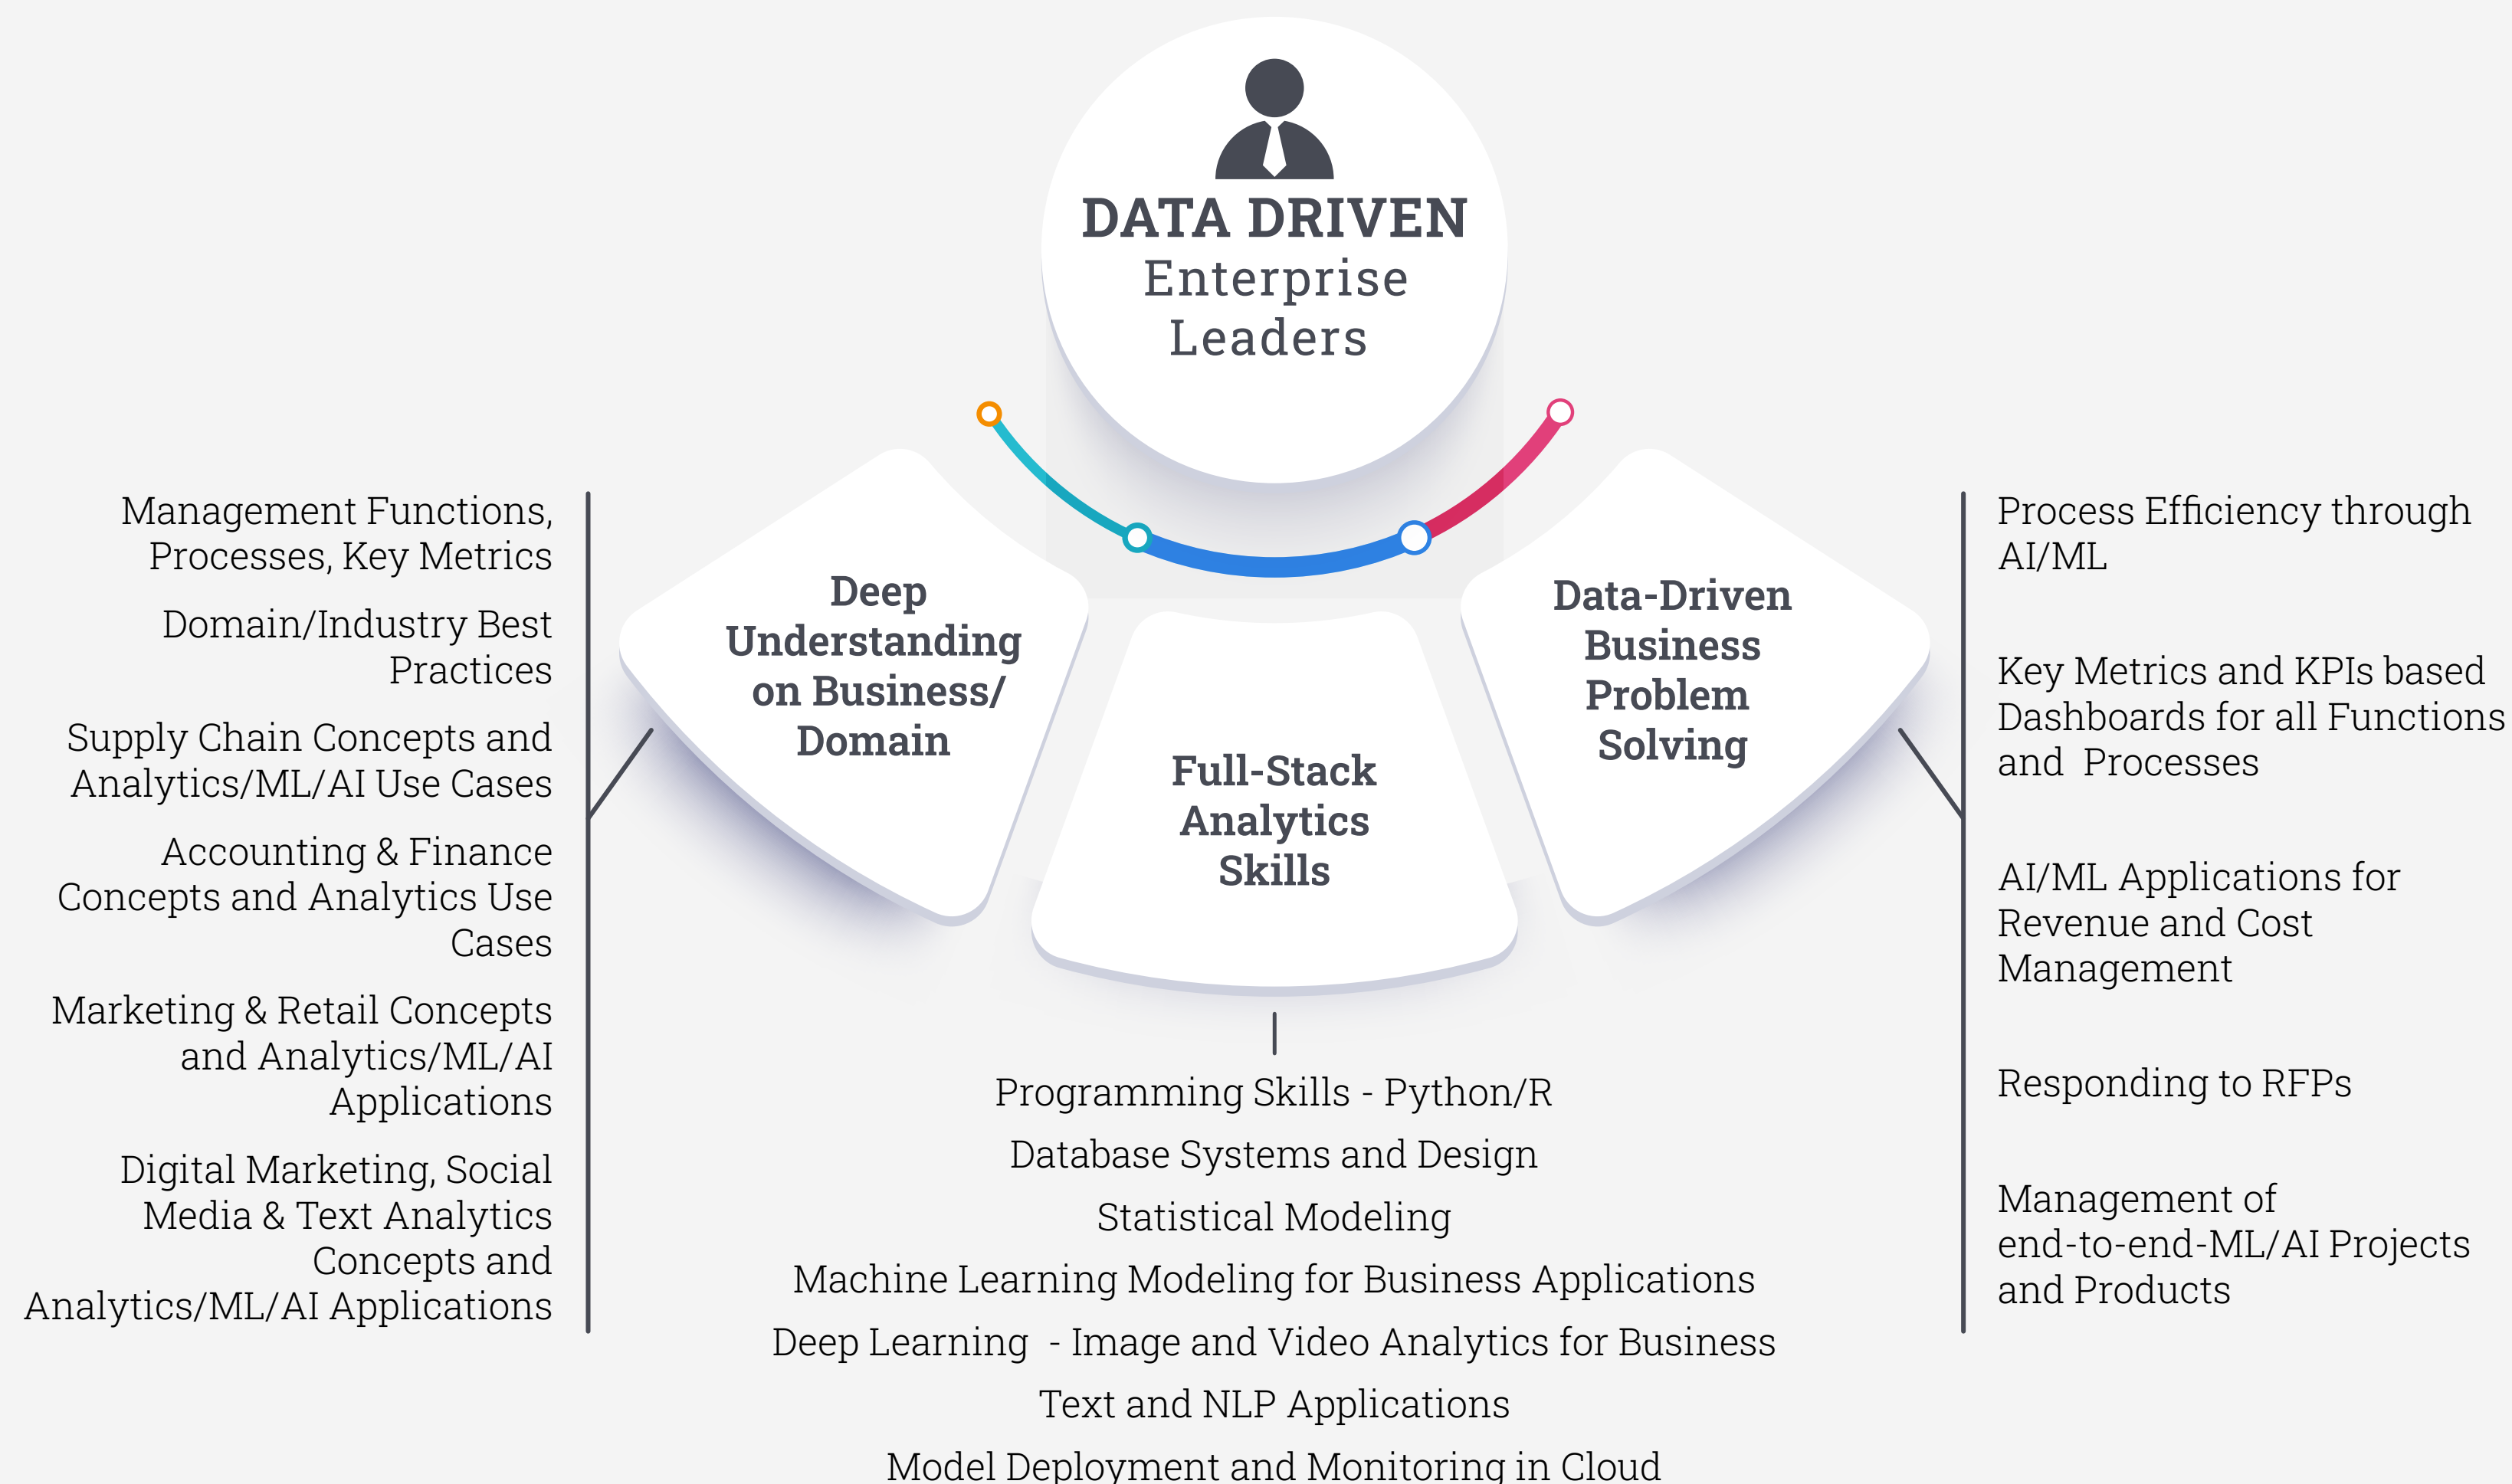

Different Challenges, Different Mental Models, Develop
Multi-Dimensional Expertise.

Become an Analytics Consultant

The M.Sc. in Business Analytics program participants in the two years of their tenure and beyond develop deep tri-dimensional frameworks that help them solve complex business challenges.

Domain/Business Understanding | ML/AI Applications | Data-Driven Business Problem Solving

Program Objectives and Industry-Ready Outcomes

“ An organization's ability to learn, and translate that learning into action rapidly, is the ultimate competitive advantage

- Jack Welch

Program Objectives

The 24-month M.Sc. in Business Analytics program in association with various industry and academic partners is designed and curated exclusively for working professionals. The participants will be able to transition into enterprise leaders with deep analytics skills. The program objective is to,

Provide in-depth knowledge and hands-on skillsets in business analytics with relevant software and frameworks that enable business decision-making and problem-solving abilities using Analytics and Artificial Intelligence across industries.

Learning Outcomes

Upon the completion of the program, the participants will develop deep expertise on:

- 01** Analytical skills using appropriate tools and analytical frameworks to understand the relationship between organizational processes and performance
- 02** Decision-making skills using appropriate visualization techniques and storytelling
- 03** Descriptive, predictive, prescriptive, and cognitive analytical models in real-life scenarios
- 04** Hands-on skills on 30 plus tools including Python, R, Apache Spark, Keras, TensorFlow, Amazon Sagemaker, AWS Rekognition, Amazon Polly, Microsoft Azure, QlikView, Tableau, Power BI, Rapid Miner, Orange, H₂O, to name a few.
- 05** Lead a team of data scientists across industries such as BFSI, ITES, E-Commerce, Retail, Healthcare, Manufacturing, etc., to solve various business problems through innovative analytics solutions.

Bespoke Program Structure

“ If you torture the data long enough, it will confess. ”
-Ronald Coase

Program Structure

84 Credits | 4 Semesters | 16 Modules | 10 Plus mini-projects | 2 Capstone Projects with Industry Mentorship | 2 Global Certifications | 1 Research Paper Publication

Semester 01

- 1. Foundations of Business Analytics (4)
- 2. Data Management and Visual Analytics (4)
- 3. Applied Statistics for Business (4)
- 4. Machine Learning (4)
- 5. Deep Learning (4)

Semester 02

- 6. Natural Language Processing and Generative AI (4)
- 7. Marketing and Retail Analytics (4)
- 8. Supply Chain Analytics (4)
- 9. Financial Analytics (4)
- 10. Capstone Project I (10)

Semester 03

- 11. Consulting in Analytics (4)
- 12. Enterprise Analytics (4)
- 13. Microsoft Certified Azure AI Engineer AI-102 (5)
- 14. Microsoft Certified Azure Data Scientist Associate DP-100 (5)

Semester 04

- 15. Capstone Project II (10)
- 16. Capstone project III - Publication (10)

(n) Number of Credits

*Candidate can enrol for a one year program and exit at the end of second semester (one year) with a PG Diploma in Business Analytics. Those who are enrolling for M.Sc., this option is not available.

Future-Ready Program Curriculum

“ In God we trust, all others must bring data.
- W. Edwards Deming ”

Semester 1

Building the Analytics Foundation

Begin your journey with a strong grounding in the core principles of **business analytics**. Master the art of **data management**, **visualisation**, and **applied statistics** to extract meaningful insights from complex datasets. Learn to apply **machine learning** techniques in a business context and explore **deep learning** models that power modern AI applications. This semester combines theory with hands-on practice to develop both analytical thinking and technical skills.

By the end of Semester 1, you will be equipped to analyze, visualize, and model data effectively, laying a solid foundation for advanced analytics and AI-driven decision-making in subsequent semesters.

Semester 2

Advanced Analytics and Industry Applications

Step into specialised domains where analytics meets real-world business impact. Explore **Natural Language Processing and Generative AI** to extract insights from unstructured data, and master **Marketing & Retail Analytics** to understand consumer behaviour. Gain expertise in **Supply Chain Analytics** to optimise operations and **Financial Analytics** to drive data-informed investment and risk decisions. The semester culminates in **Capstone Project I**, where you solve a live industry problem under expert mentorship.

By the end of Semester 2, you will be proficient in applying advanced analytics and AI techniques to diverse business functions, delivering actionable insights and measurable business outcomes.

Semester 3

Enterprise Analytics and Global Certifications

In Semester 3, you'll move beyond core analytics into enterprise-level strategy and implementation. Gain expertise in **Consulting in Analytics** to advise organisations on data-driven transformations, and master **Enterprise Analytics** to design scalable, impactful solutions. This semester also prepares you for two globally recognised credentials—**Azure AI Engineer (AI-102)** and **Azure Data Scientist Associate (DP-100)**—enhancing your cloud-based AI and data science capabilities.

By the end of Semester 3, you will be equipped to lead enterprise analytics initiatives, provide strategic consulting, and deploy AI-driven solutions at scale with industry-validated certifications.

Semester 4

From Capstone to Career Launch

The final semester is all about showcasing your expertise and delivering impactful solutions. Through Capstone Project II and Capstone Project III – Publication, you will work on complex, high-value business challenges, often in collaboration with industry partners. These projects not only strengthen your problem-solving and execution skills but also provide opportunities for research publications in reputed journals and conferences. This is where your entire learning journey comes together—strategy, analytics, technology, and innovation in action.

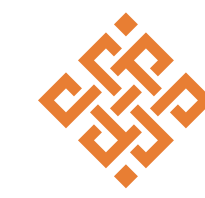

By the end of Semester 4, you will have a strong professional portfolio, industry-recognised credentials, and potentially a published research paper, making you industry- and research-ready.

Partners and Global Certifications

“ The goal is to turn data into information, and information into insight. ”

- Carly Fiorina, Former CEO of HP

Partners

RACE, REVA University is an academic partner for Microsoft. M.Sc. Business analytics participants will get unlimited access to our academic partners' ecosystem which includes the Cloud labs access, Course Materials, Partners' LMS, placement services, mentoring sessions, and more.

Microsoft Azure is the leading cloud platform and productivity company for the mobile-first, cloud-first world, and its mission is to empower every person and every organization on the planet to achieve more. Through this partnership, our participants will get access to their 100's of courses, certification opportunities, and placement services. Cloud labs with credits will be provided to practice the real-time deployment of projects.

This program is powered by
**various globally
renowned marquee
organizations.**

Continuous Evaluation and Certification

The world is one big data problem.
- Andrew McAfee, co-director of the MIT Initiative

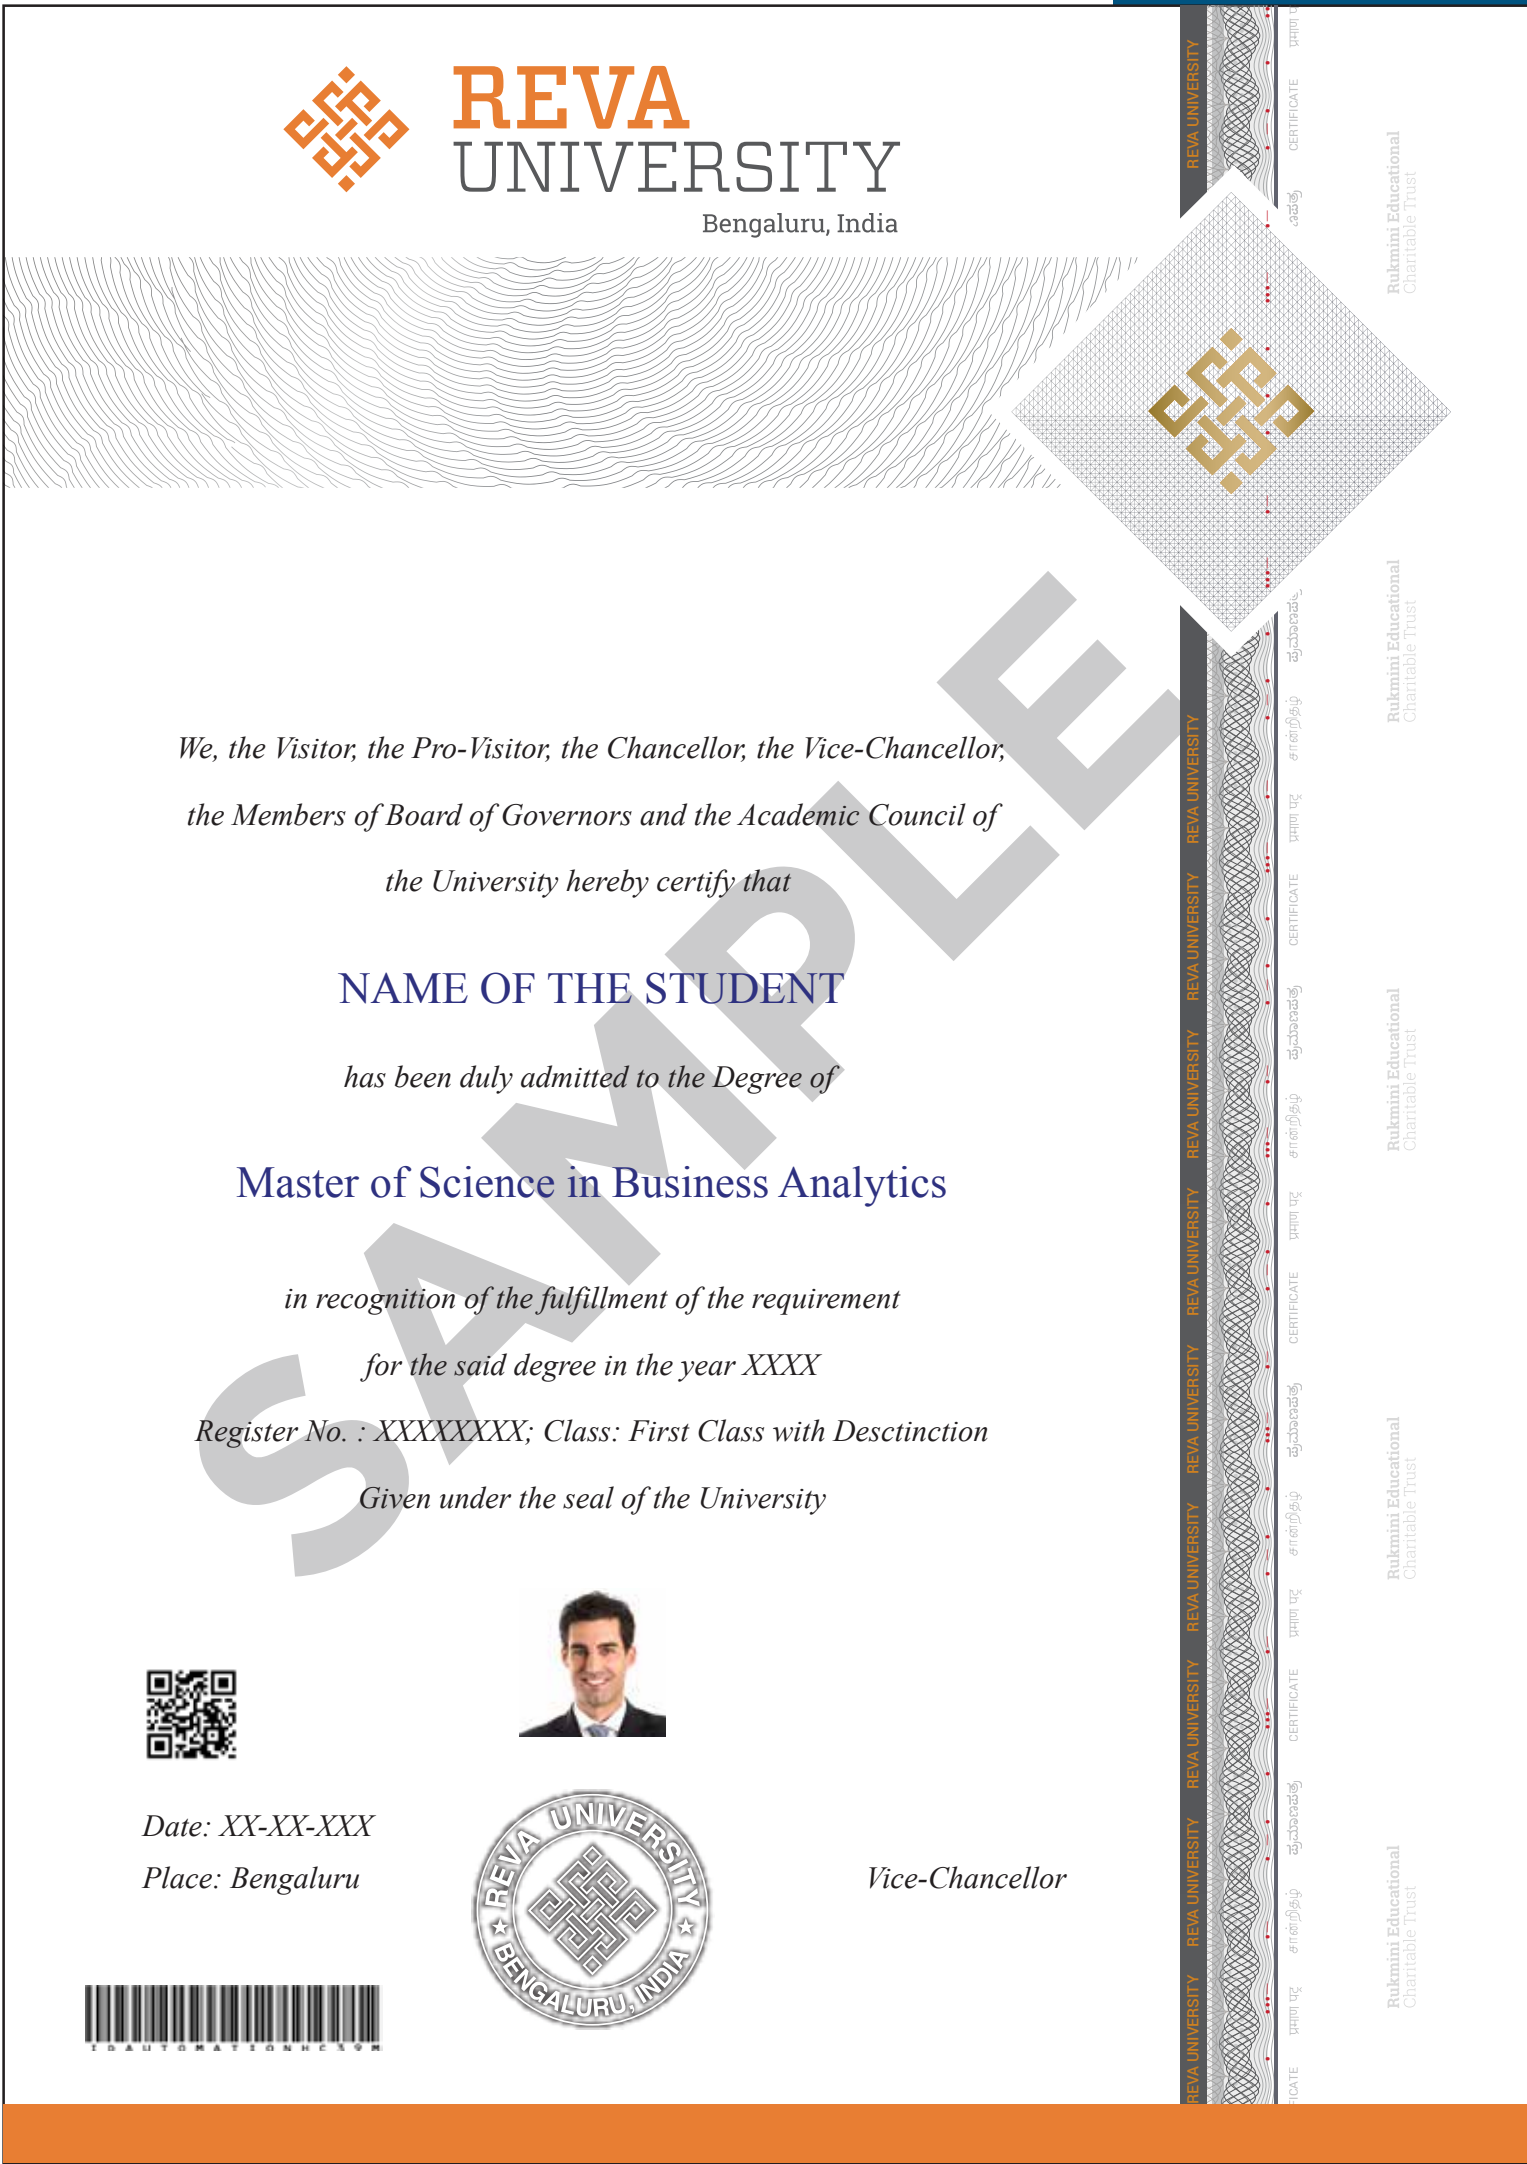

Continuous Evaluation

This is a globally accredited program to make the participants truly global citizens. At par with international standards and to provide opportunities for global mobility to our participants, we follow an outcome-based education system (OBE). Experiential learning and project-based pedagogy have been employed in the design and delivery of the program.

Never
Stop
Learning!

The objective of module assessment and evaluation is to objectively assess the learners of the program on their ability to apply the concepts, modeling techniques in various domains and verticals for different business scenarios through a continuous evaluation framework throughout the program. Detailed regulations on earning the credits and GPA’s will be shared during the program.

Participants' Profiles

Diversity is a Catalyst to Learning

“ Every company has big data in its future and every company will eventually be in the data business.
- Thomas H. Davenport

Participants' Profiles

RACE, REVA University provides an excellent opportunity to learn from a diverse group of extremely talented and committed peers. As a discerning candidate, one must always consider classroom diversity as a key factor while choosing the program. You will not only interact with your cohorts but also with other program participants through various collaborative tools like MS-Suite/LMS and other social groups. A diverse peer group with varied skills and career aspirations is a must to widen your network, bringing new opportunities. These peers might become your colleagues, clients, or vendors in the future.

Research, Innovation and Consulting Opportunities

“ If we have data, let's look at data. If all we have opinions, let's go with mine.

- Jim Barksdale, Former Netscape CEO

Research and Innovation

For a discerning learner, RACE provides unlimited opportunities to improve one's resume through participating in industry-grade projects and consulting opportunities. RACE consulting solutions, either turnkey or plug and play models provide end-to-end design, implementation, and training support.

A few of the ongoing sponsored projects and commercial products are listed here.

Bright and committed

participants will get to work with senior industry leaders on solving challenging business problems with AI and ML

01 Employee Life Cycle Analytics (ELCA™)

RACE has a dedicated research wing working on HR analytics across industries. It has imparted / implemented best practices for Employee Life Cycle Analytics (ELCA™) through its unique framework. ELCA™ is implemented as a turnkey project or in modules on plug and play mode, which can be customized based on the participating organizations that are intended to adopt HR analytics with assured monetary benefits.

02 Customer Life Cycle Analytics (CLCA™)

Customer Intelligence based on the Customer Life Cycle Analytics (CLCA™) solution from RACE labs enables anyone to use the packaged AI/DS to understand and serve their customers better.

03 Supply Chain Analytics (SCAn™)

This solution provides data models and domain models for supply chain analytics. With multiple analytical technologies like the Theory of Constraints (ToC) and Machine learning, the SCAn engine brings the power to provide the controls required to build efficient data-driven supply chain systems. An end-to-end discovery from typical supply chain data, predictive models for inventory planning, demand forecasting, and stock events like stock out are part of this solution.

Schedule and Support

Customized to Suit Working Professionals

REVA
UNIVERSITY
Bengaluru, India

Learning from data is virtually universally useful. Master it and you will be welcomed anywhere.

- John Elder, Elder Research

Program Schedule

The live instructor-led sessions are scheduled on weekends. Support sessions, boot camps, workshops, webinars, etc., are scheduled on weekdays post regular working hours as per the convenience for working professionals.

Get access to
seamless learning
and support through
multiple
platforms

Learning Management System:

LMS is the one-stop destination for connecting to the program contents, video recordings of the classes, research repositories like IEEE, EBSCO and others, assignment submissions, connecting with mentors, etc.

The program office provides customized support in resume building, mock interviews, placements, career enhancement sessions, and more.

Our dedicated team of academicians, mentors, and researchers will provide support in designing and writing technical reports, publishing in reputed journals and conferences, etc. Various support sessions/webinars/special sessions will be held in addition to the regular session during evenings and weekends.

We conduct regular boot camps, workshops, and hackathons to help our participants to implement analytics projects or writing reports with hands-on support sessions.

Eligibility to Apply

Application Process and Program Fee

Data that sit unused are no different from data that were never collected in the first place.

- Doug Fisher

Application Process

Who Can Apply?

Candidates who aspire for a career transition to job roles such as Data Scientist, Business Analyst, Data Engineer, etc., can apply to this one-of-a-kind 24-month M.Sc. in Business Analytics program at RACE.

- Working professionals with an undergraduate degree in any discipline and have a minimum of 3-year industry experience.
- 50% marks in the undergraduate program (45% in case of SC/ST candidates)
- The ability to understand and interpret data
- Passion to learn and a commitment to devote time.

Selection is based on merit and interview. Candidates with 2-3 years of experience should appear for an entrance exam and subsequent interview.

Program Fee : INR 4.8 Lakhs

1st Year : INR 3.8 Lakhs

2nd Year : INR 1.0 Lakhs

Easy EMI option for the payment of fee without hassle from our associated banks is available.

How to Apply

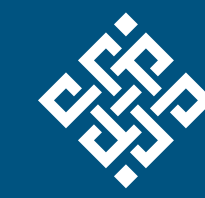

- [Click here](#) to apply for the program
- Fill in the details of the Registration Form and Register
- Pay Application Fee of INR 1,000 using preferred payment methods
- Fill in the application and submit

About REVA University and REVA Academy for Corporate Excellence - RACE

“ The most valuable commodity I know of is information.
- Gordon Gekko, Wall Street ”

REVA University

REVA University has been established under the REVA University Act, 2012 with the vision to instil awareness, a zeal for higher learning and inquisitiveness in the minds of students through education. REVA University was conceptualised to bring change in the lives of students through the revisualisation of present academic scenario. The University breathes and practises an ideology that takes education to greater heights by motivating each learner. The Founder of REVA University believes in the adage 'Knowledge is Power'. Driven by this power of transforming lives, REVA succeeded in its educational endeavours by creating knowledge societies, imparting quality education and building responsible future generations.

REVA demonstrates a complete involvement in the field of education, which is complemented and enhanced by its verdant surroundings. The University retains a colossal landscape blanketed over 45+ acres of land, which is a standing testimony to inspire learners and smooth exchange of ideas. The University prides itself in contributing to the holistic development of every student.

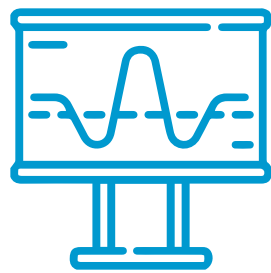

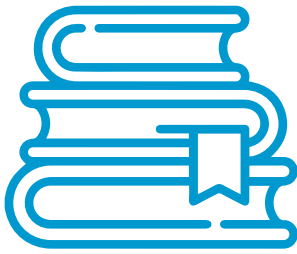

Currently, the REVA University offers 33 undergraduate programs, 23 full-time PG programs, 2 part-time PG programs in Engineering and Technology, Science, Commerce and Management, Architecture, Law and Humanities in addition to research degrees leading to M.Phil. and Ph.D. in different disciplines.
