Power Up Your Career with Artificial Intelligence

Experts estimate a **50%**
chance that machines
will achieve superintelligence
leading to **Artificial General**
Intelligence -AGI by 2060.

Data is now the new electricity; all decisions need to be powered by data.

Foreword

Artificial intelligence - AI is the simulation of human intelligence by computer systems. Today, AI-powered systems can learn (acquire the information and rules and using the data), reason (using rules to reach approximate or definite conclusions), and perform self-correction.

From SIRI to self-driving cars, today, artificial intelligence is ubiquitous and has entered into every sphere of our life through the products and services we use daily. While science fiction often portrays AI as robots with human-like characteristics, AI can encompass anything from Google's search algorithms to autonomous vehicles. Thanks to deep learning, computers can perform complex tasks by processing vast quantities of data and by identifying data patterns, making AI-powered decisions faster and more efficient.

To master the concepts, gain hands-on skills, and harness the opportunities in AI, RACE at REVA University has designed a bespoke Master's program suitable for IT professionals and organizations who would want to steer their careers towards building exciting products and projects with AI.

The program will help the learners to gain knowledge and deep skills on AI technologies. This program focuses on key AI technologies such as machine learning, natural language processing, deep learning, and more. Emphasis is on building research-driven innovative solutions with the collective intelligence of people, and computers to solve business and social problems.

This is an Artificial Intelligence Engineer master's course with a comprehensive learning approach for mastering Artificial Intelligence, Data Science, Business Analytics, Business Intelligence, and Deep Learning using various tools like Python, TensorFlow, Spark, H2O, AutoML tools, etc. Upon the completion of the training, you will be able to take on challenging roles in the Artificial Intelligence domain.

A bespoke Master's program powered by data, designed by industry thought leaders and delivered by REVA Academy for Corporate Excellence, REVA University can help you fast track your journey to the top echelons of organizations of tomorrow.

Five Reasons to Choose Artificial Intelligence Program

A Master's program like no other with hands-on experiential learning, bringing together **technical & functional problem skills**, strung together by the **power of ML and AI**.

“ One of our big goals in search is to search that understands exactly what you want, understands everything in the world which we call as artificial intelligence. ”

- Larry Page, Google Co-founder

Five Reasons to Choose Artificial Intelligence Program

01 Develop Full-Stack AI skills

This unique program will help the learners to design end-to-end AI solutions and data-driven processes and systems. The program emphasizes building technical solutions with machine learning and/or deep learning, and deploying and monitoring them on-premise/cloud.

02 Three Global Certifications from MS Azure

The participants will get access to globally renowned cloud platforms, Microsoft Azure. They will have unlimited access to our academic partners' ecosystem including the Cloud labs access, course materials, partners' LMS, placement services, mentoring sessions, and two global certifications.

03 Building Techno- Functional Expertise

A well-balanced program curriculum ensures that the learner builds deep technical and functional expertise in building Machine Learning/Deep Learning-based applications in all the enterprise functions, new projects, and product developments based on the business/social/research challenges, thus

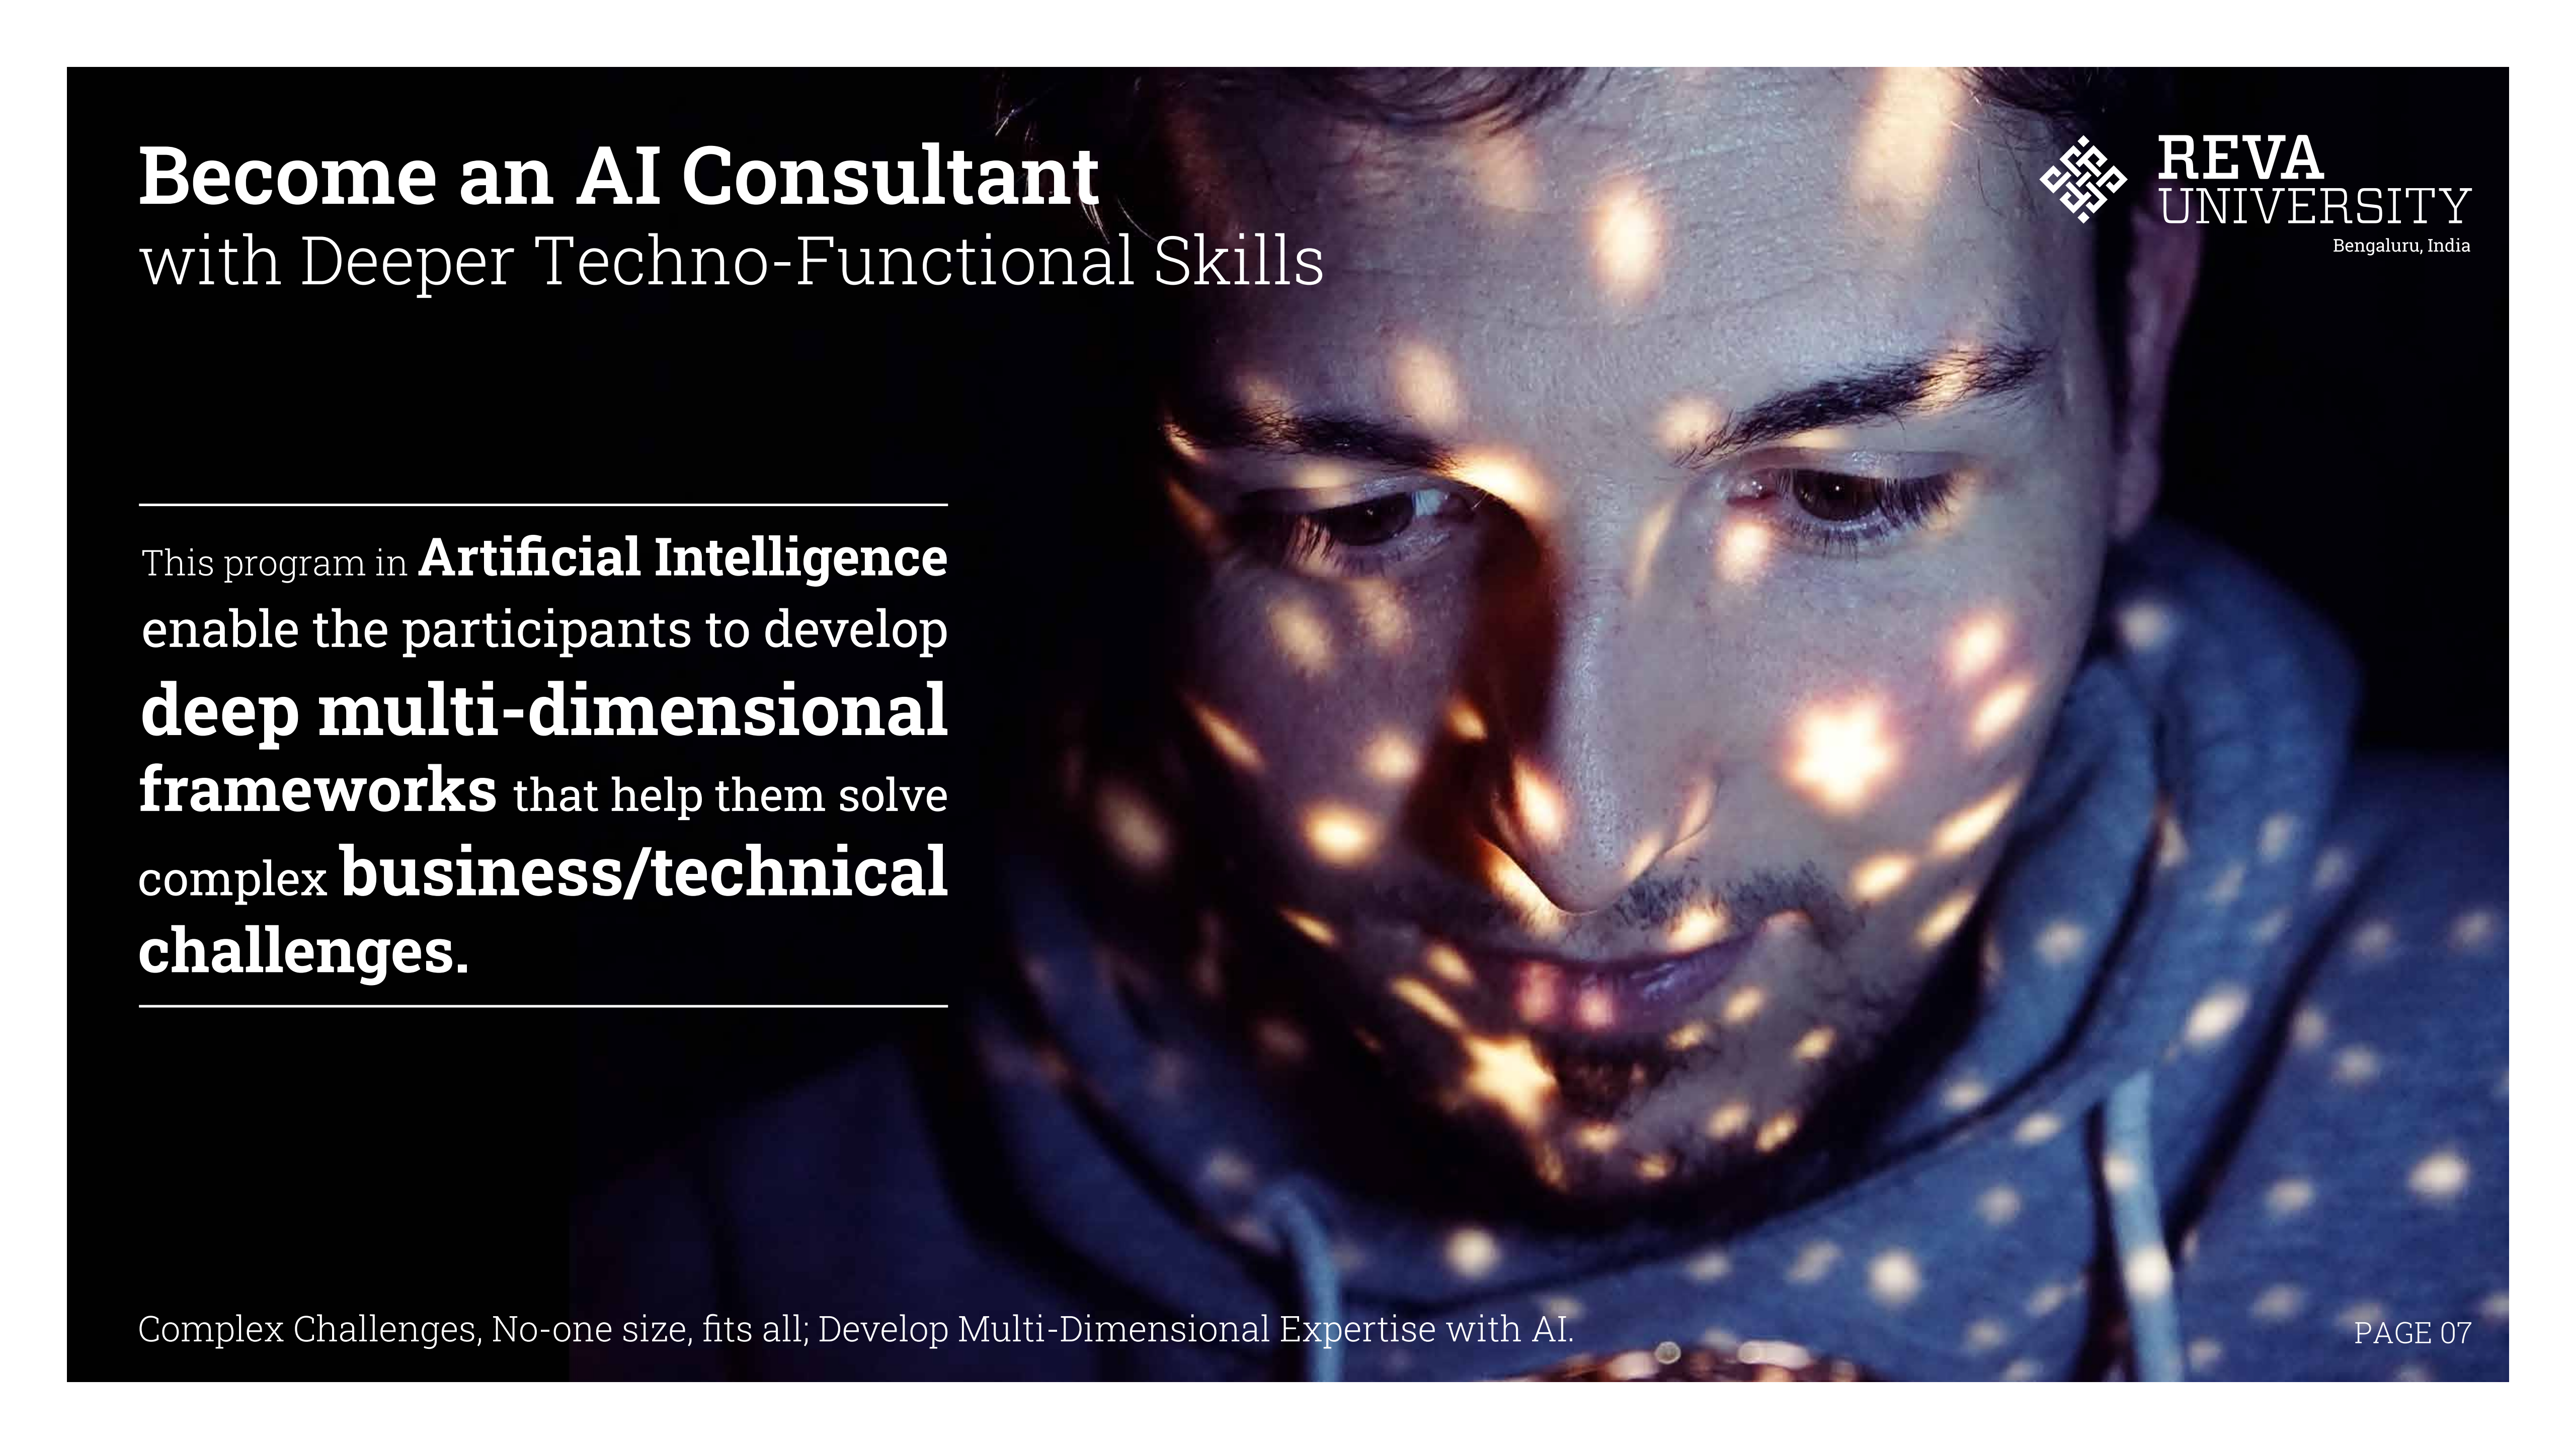

making a very strong resume with hands-on skills which are a rarity today.

04 Hands-on Learning with Focus on Research and Innovation

During this two-year M.Tech/M.Sc. in AI program, the learners will get to work on 15 plus mini-projects, four plus full-scale projects, and research publication(s). These projects are mentored by industry thought leaders and hence career transformational. The projects range from business use cases to cutting-edge deep learning product development.

05 Lateral Placement with Career Guidance & Support

A vast network of 50 plus industry mentors, 100 plus marquee organizations as placement partners, 1000 plus strong alumni network ensures a successful career transition of the learners into AI Architects during the program. The lateral placement process is uniquely designed with one-on-one career guidance and mentoring sessions, resume building support, special training, and mock interviews that support the learners to be placed nationally and internationally on an average of 50 to 200% increase in salary.

Become an AI Consultant

with Deeper Techno-Functional Skills

REVA
UNIVERSITY
Bengaluru, India

This program in **Artificial Intelligence** enable the participants to develop **deep multi-dimensional frameworks** that help them solve complex **business/technical challenges**.

Career with Artificial Intelligence

By engaging in the module sessions and real-time projects, the participants will get exposure to full-stack AI skills.

Program Objectives and Industry-ready Outcomes

The program in **Artificial Intelligence** in association with various **industry** and **academic** partners is designed and curated exclusively for **working** professionals.

“ Predicting the future isn't magic, it's artificial intelligence. ”
- Dave Waters

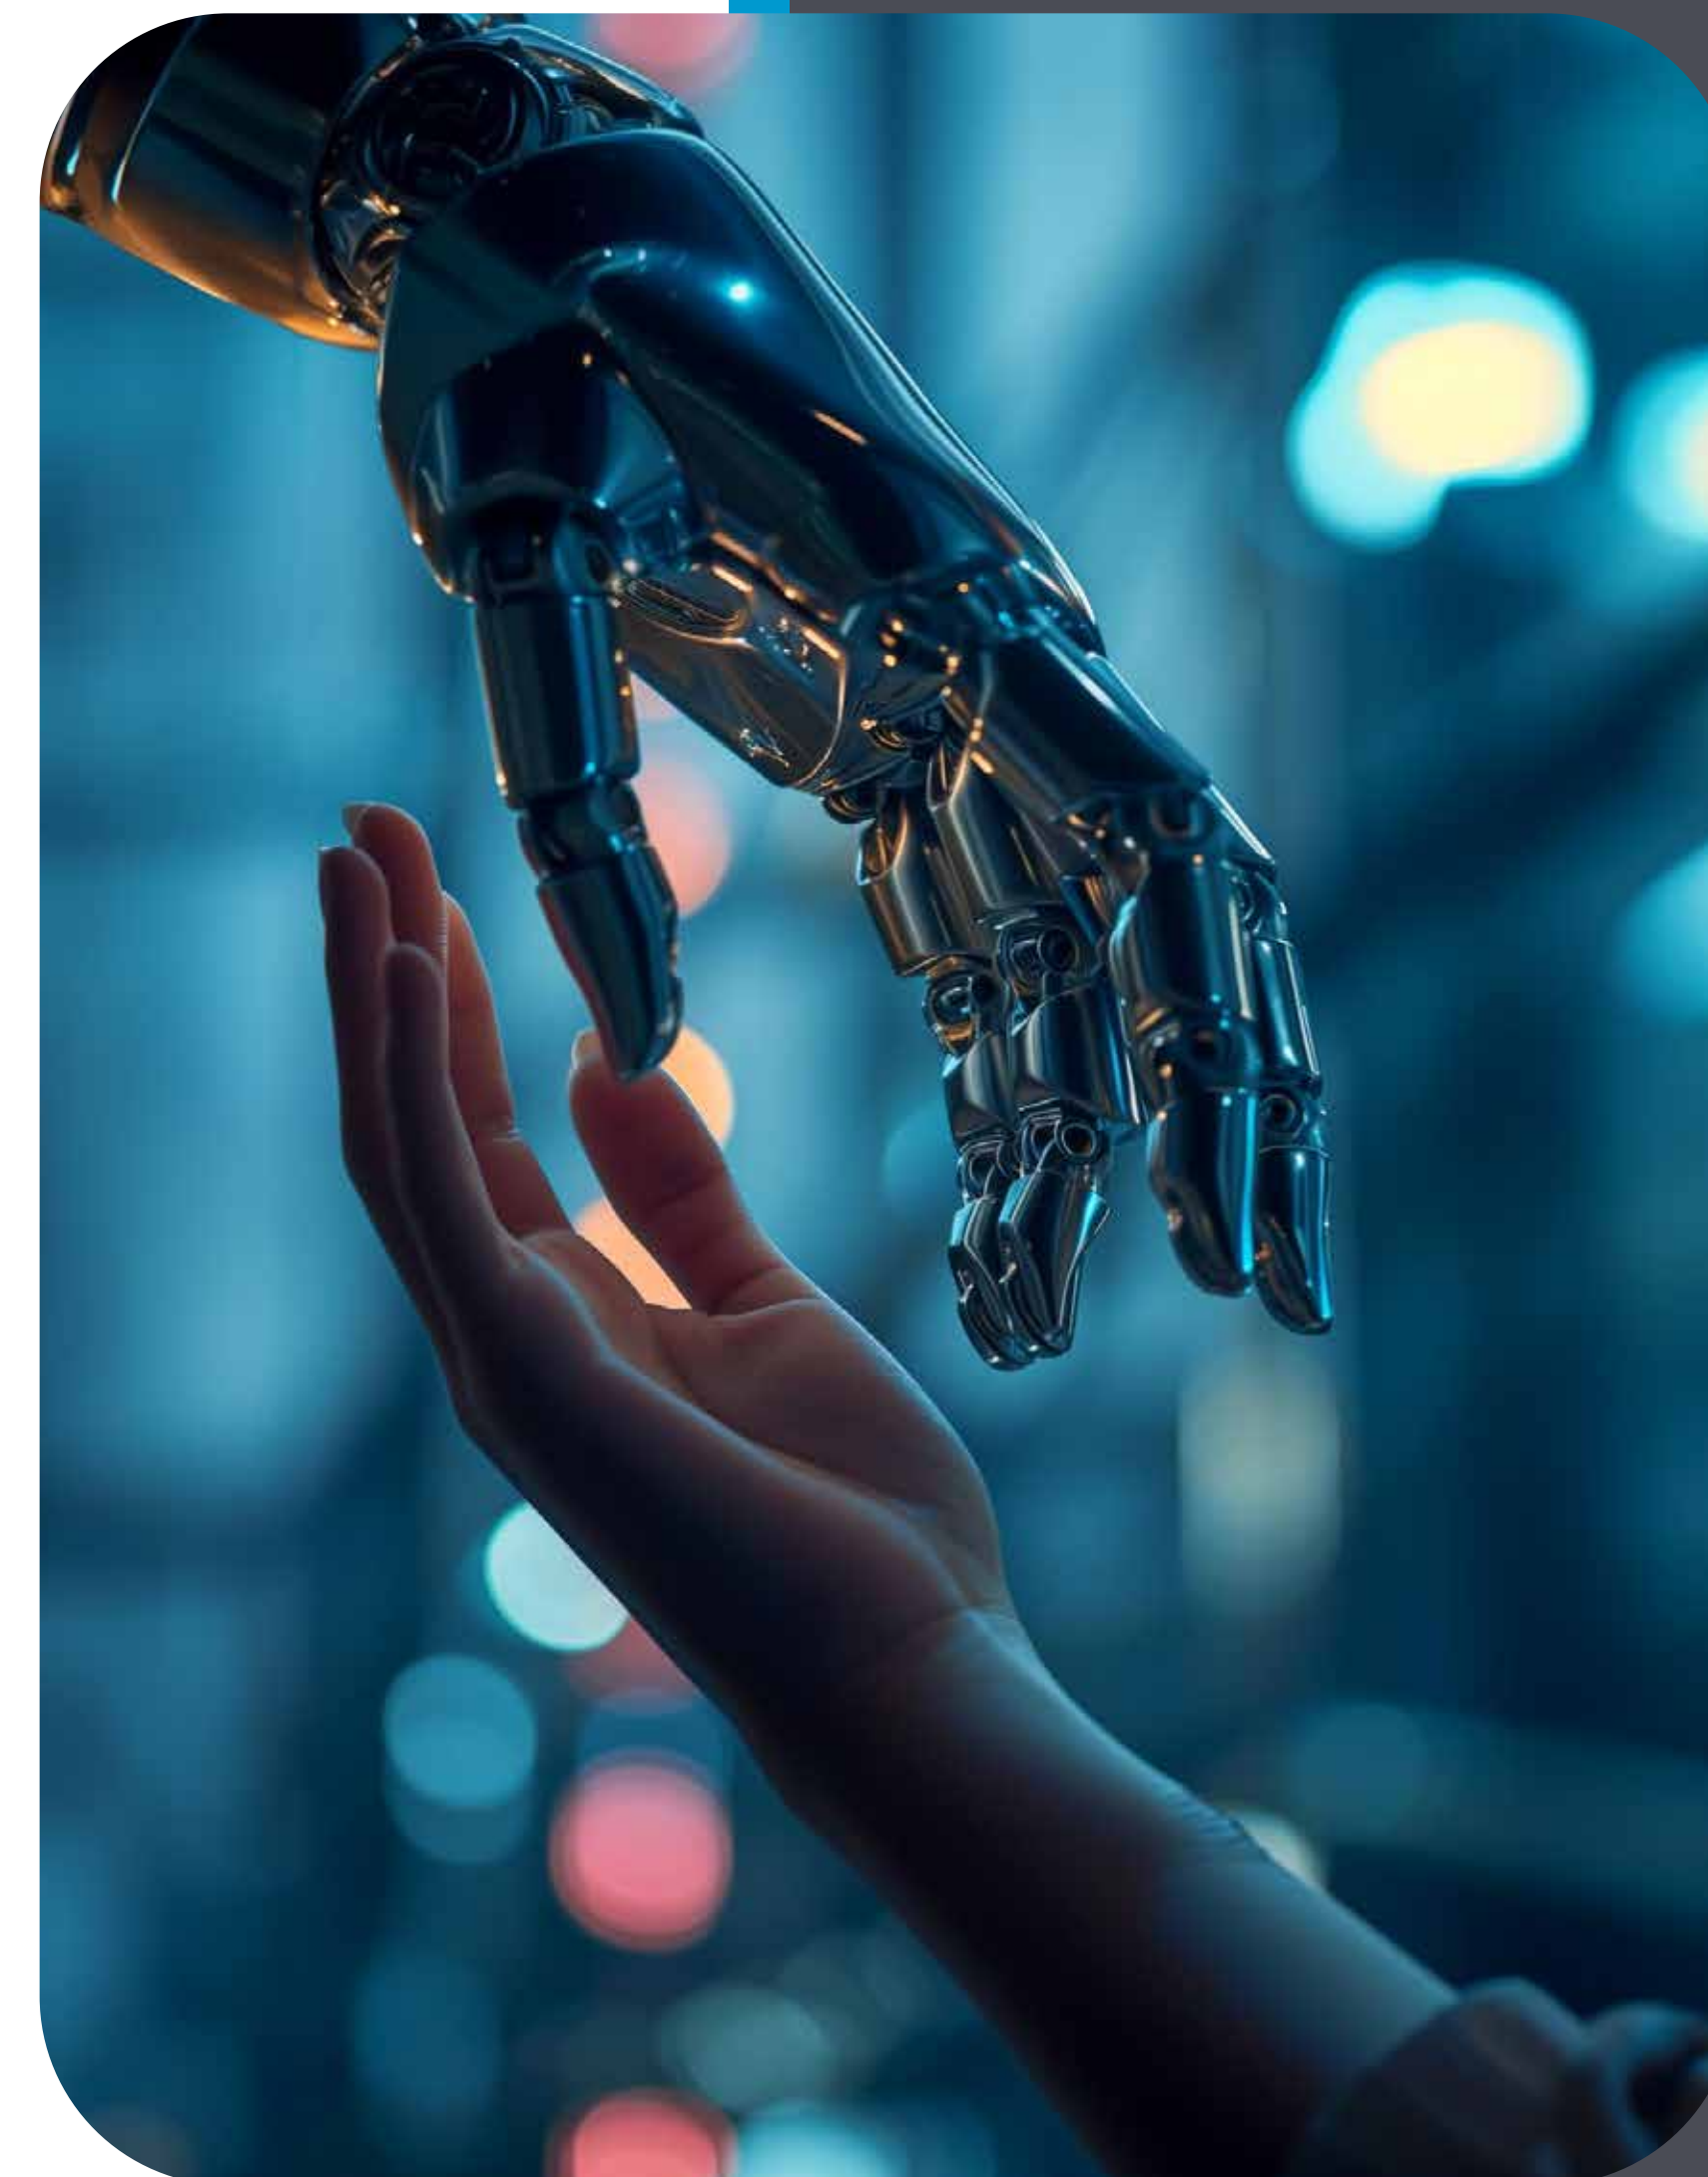

The participants will be able to make a transition from the basics of dealing big data to build ML systems and deploy AI models enabling real-time capabilities.

Learning Outcomes

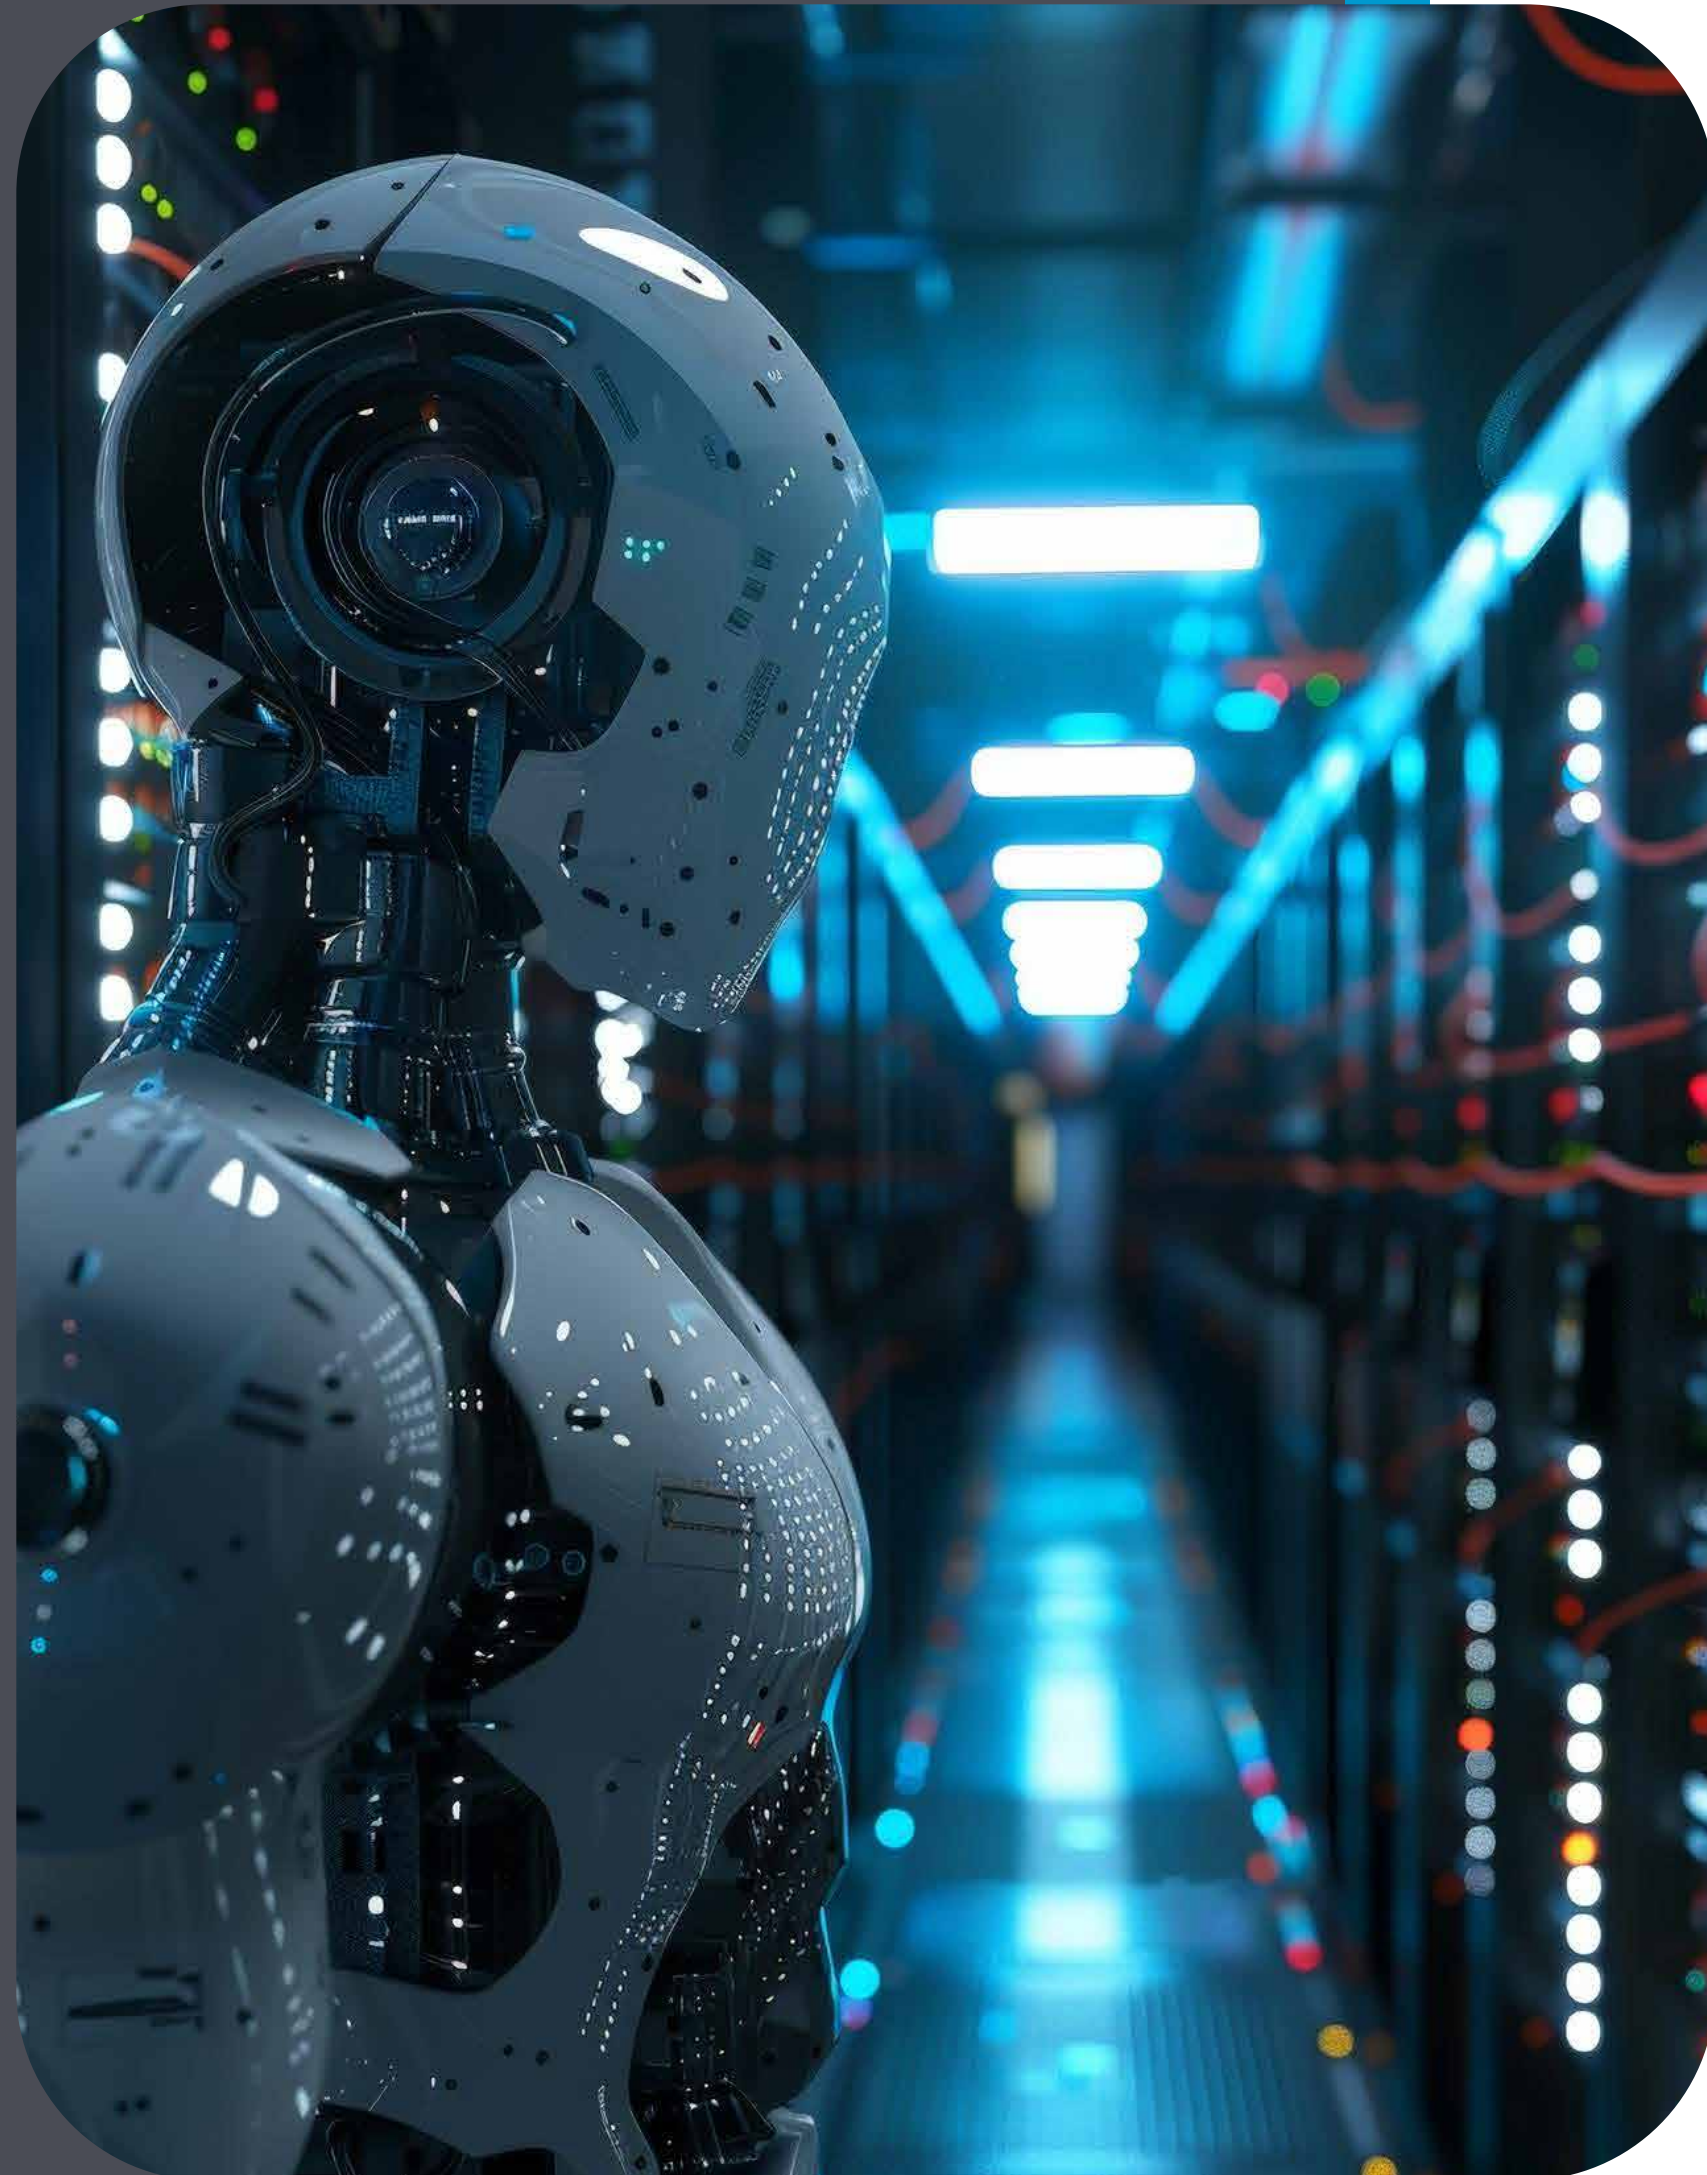

- 01** Building blocks of AI in terms of intelligent agents, search, knowledge representation, inference, logic, and learning.
- 02** Machine Learning, Deep Learning, Bayesian Models, Fuzzy Systems, and Reinforcement models in real-life scenarios.
- 03** Implementing AI systems to solve industrial, business, and social problems.
- 04** 30 plus tools including Python, R, Apache Spark, Keras, TensorFlow, Amazon Sagemaker, AWS Rekognition, Amazon Polly, Microsoft Azure, QlikView, Tableau, Power BI, Rapid Miner, Orange, H2O, to name a few.
- 05** Lead AI product development/project management across industries to solve business/technical problems through innovative solutions powered by AI.

The Program Objective is to provide in-depth knowledge and skillsets in Artificial Intelligence for business and social problem-solving.

Bespoke Program Structure

“ I visualize a time when we will be to robots what dogs are to humans, and I'm rooting for the machines. ”
- Claude Shannon

84 Credits | 4 Semester | 14 Modules | 10+ mini-projects | 2 Capstone Projects with Industry Mentorship | 2 Global Certifications | 1 Research Paper Publication

Semester 01

1. Programming Essentials for AI
5 credits
2. Mathematics and Statistics for AI
5 credits
3. Machine Learning
5 credits
4. Deep Learning
5 credits

Semester 02

5. Natural Language Processing and LLMs
4 credits
6. Computer Vision and Generative AI
4 credits
7. Production and Maintenance of AI systems
4 credits
8. Capstone Project
10 credits

Semester 03

9. Fuzzy Systems and Reinforcement Learning for AI
5 credits
10. Multimodal AI Systems: Speech, Text, and Conversational Agents
5 credits
11. Azure AI Engineer (AI-102)
6 credits

Semester 04

12. Microsoft Certified Azure Data Scientist Associate DP-100
10 credits
13. Capstone Project II
10 credits
14. Capstone project III - Publication
10 credits

*Candidate can enrol for a one year program and exit at the end of second semester (one year) with a PG Diploma in Artificial Intelligence. Those who are enrolling for MSc, this option is not available.

Global Certifications

“ Robots are not going to replace humans, they are going to make their jobs much more humane. Difficult, demeaning, demanding, dangerous, dull – these are the jobs robots will be taking. ”
- Sabine Hauert

This program is
powered by
various globally
renowned
marquee
organizations
like **Microsoft.**

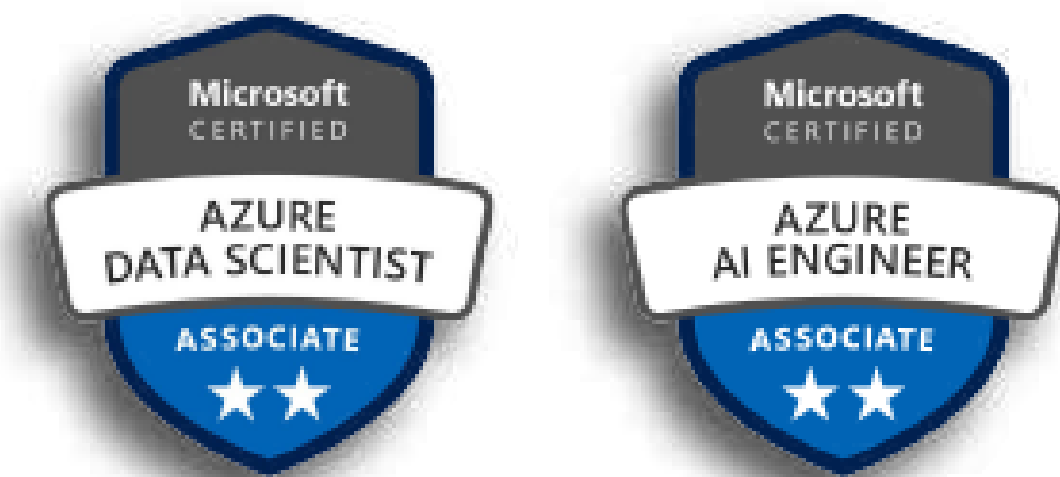

Global Certifications

RACE, REVA University is an academic partner for Microsoft. The program participants will get unlimited access to our educational partners' ecosystem, Course Materials, Partners' LMS, placement services, mentoring sessions, and more.

Microsoft Azure is the leading cloud platform and productivity company for the mobile-first, cloud-first world, and its mission is to empower every person and every organization on the planet to achieve more. Through this partnership, our participants will get access to their 100's of courses, certification opportunities, and placement services. Cloud labs with credits will be provided to practice the real-time deployment of projects.

2 Global Certifications

Continuous Evaluation and Certification

Learning is a **life long process**
Machines are learning today, you
are not spared!

“ Machines will follow a path that mirrors the evolution of humans. Ultimately, however, self-aware, self-improving machines will evolve beyond humans' ability to control or even understand them. ”

- Ray Kurzweil

Continuous Evaluation

This is a globally accredited program to make the participants truly global citizens. At par with international standards and to provide opportunities for global mobility to our participants, we follow an outcome-based education system (OBE). Experiential learning and project-based pedagogy have been employed in the design and delivery of the program.

**Never
Stop
Learning!**

The objective of module assessment and evaluation is to objectively assess the learners of the program on their ability to apply the concepts, modeling techniques in various domains and verticals for different business scenarios through a continuous evaluation framework throughout the program. Detailed regulations on earning the credits and GPA's will be shared during the program.

Participants' Profiles

Diversity is a Catalyst to Learning

“ Today's AI is about new ways of connecting people to computers, people to knowledge, people to the physical world, and people to people.”

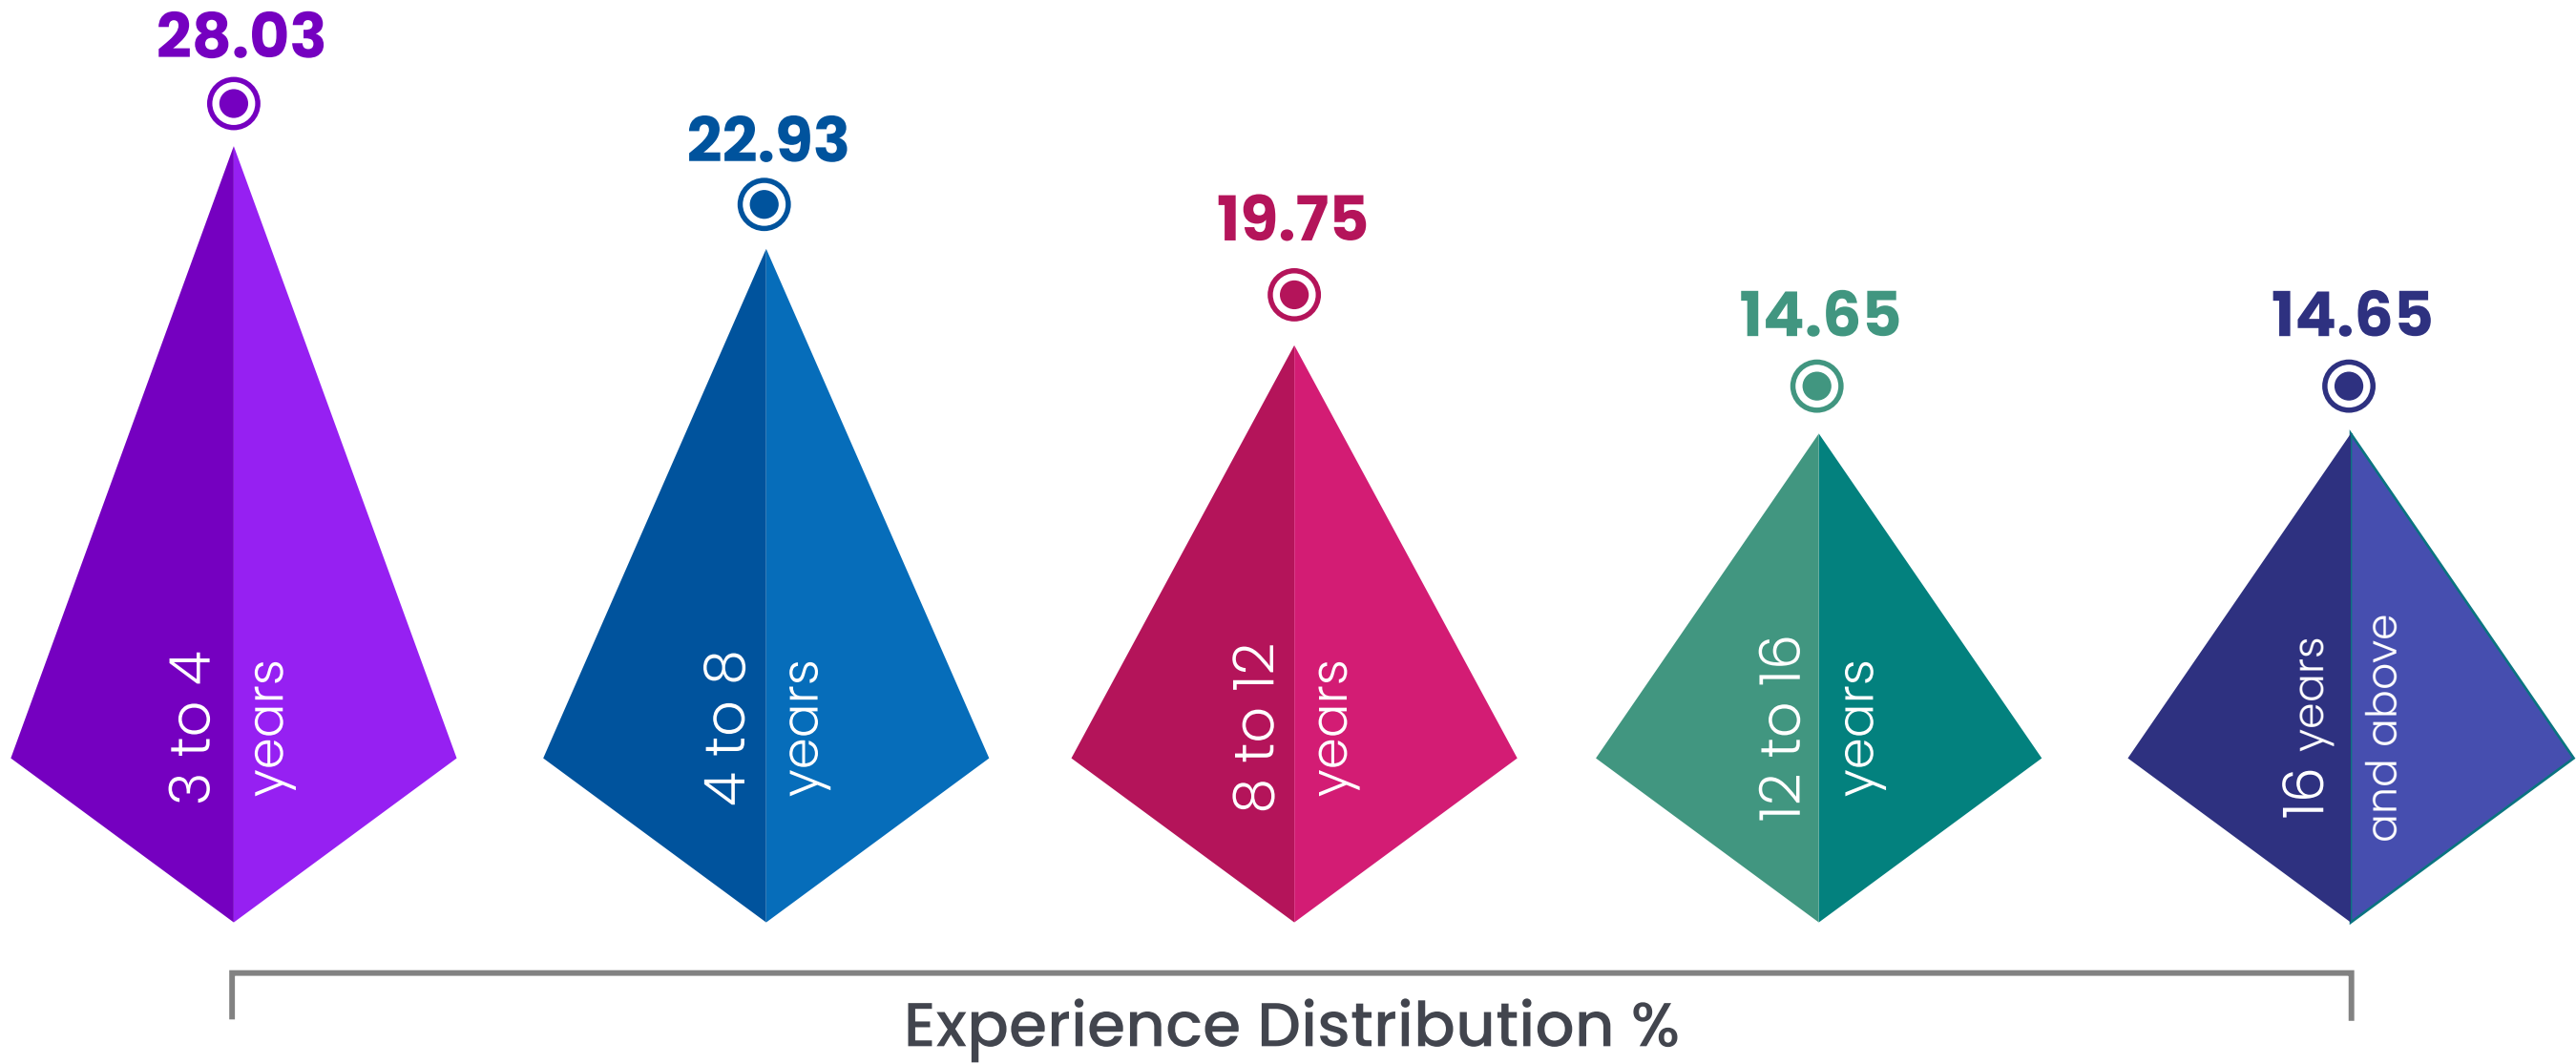

- Patrick Winston

Participants' Profiles

RACE, REVA University provides an excellent opportunity to learn from a diverse group of extremely talented and committed peers. As a discerning candidate, one must always consider classroom diversity as a key factor while choosing the program. You will not only interact with your cohorts but also with other program participants through various collaborative tools like MS-Suite/LMS and other social groups. A diverse peer group with varied skills and career aspirations is a must to widen your network, bringing new opportunities. These peers might become your colleagues, clients, or vendors in the future.

Research, Innovation and Consulting Opportunities

“ No company is going to survive in the future without implementing, or at least gaining an understanding of, artificial intelligence and how it can be used to better grasp data they collect. ”

- David Gasparian

Bright and committed

participants will get to work with senior industry leaders on solving challenging business problems with AI and ML

Research and Innovation

For a discerning learner, RACE provides unlimited opportunities to improve one's resume through participating in industry-grade projects and consulting opportunities. RACE consulting solutions, either turnkey or plug n play models, provide end-to-end design, implementation, and training support.

Center of Excellence (CoE) in Natural Language Technologies (NLT/NLP/NLG/NLU): The researchers associated with our Center of Excellence initiatives in AI work on various projects including sponsored projects and commercial product development.

01 EduTech Projects

A set of researchers is building a Computer-Aided Pronunciation and Reading System (CAPRS). This is an Artificial Intelligence (AI) and Natural Language Processing (NLP) system for one-to-one tutoring with a mobile app/humanoid simulator for primary students to learn different skills in their vernacular languages.

02 QnA System for Bilingual Learning

The researchers are building a QnA system with deep learning trained on the Kannada language dataset to evaluate the emotions and recommended answers/actions. This model is used to make a recommendation system for citizen helplines, understand citizen's voices, and suggest possible measures to decision-makers.

03 Customer Life Cycle Analytics (CLCA™)

Customer Intelligence based on the Customer Life Cycle Analytics (CLCA™) solution from RACE labs enables anyone to use the packaged AI/DS to understand and serve their customers better.

04 Supply Chain Analytics (SCAn™)

This solution provides data models and domain models for supply chain analytics. With multiple analytical technologies like the Theory of Constraints (ToC) and Machine learning, the SCAn engine brings the power to provide the controls required to build efficient data-driven supply chain systems. An end-to-end discovery from typical supply chain data, predictive models for inventory planning, demand forecasting, and stock events like stock out are part of this solution.

Schedule and Support

Customized to Suit Working Professionals

“

I believe that at the end of the century the use of words and general educated opinion will have altered so much that one will be able to speak of machines thinking without expecting to be contradicted.

”

- Alan Turing

Program Schedule

The live instructor-led sessions are scheduled on weekends. Support sessions, boot camps, workshops, webinars, etc., are scheduled on weekdays post regular working hours as per the convenience for working professionals.

Get access to
seamless learning
and support through
multiple
platforms

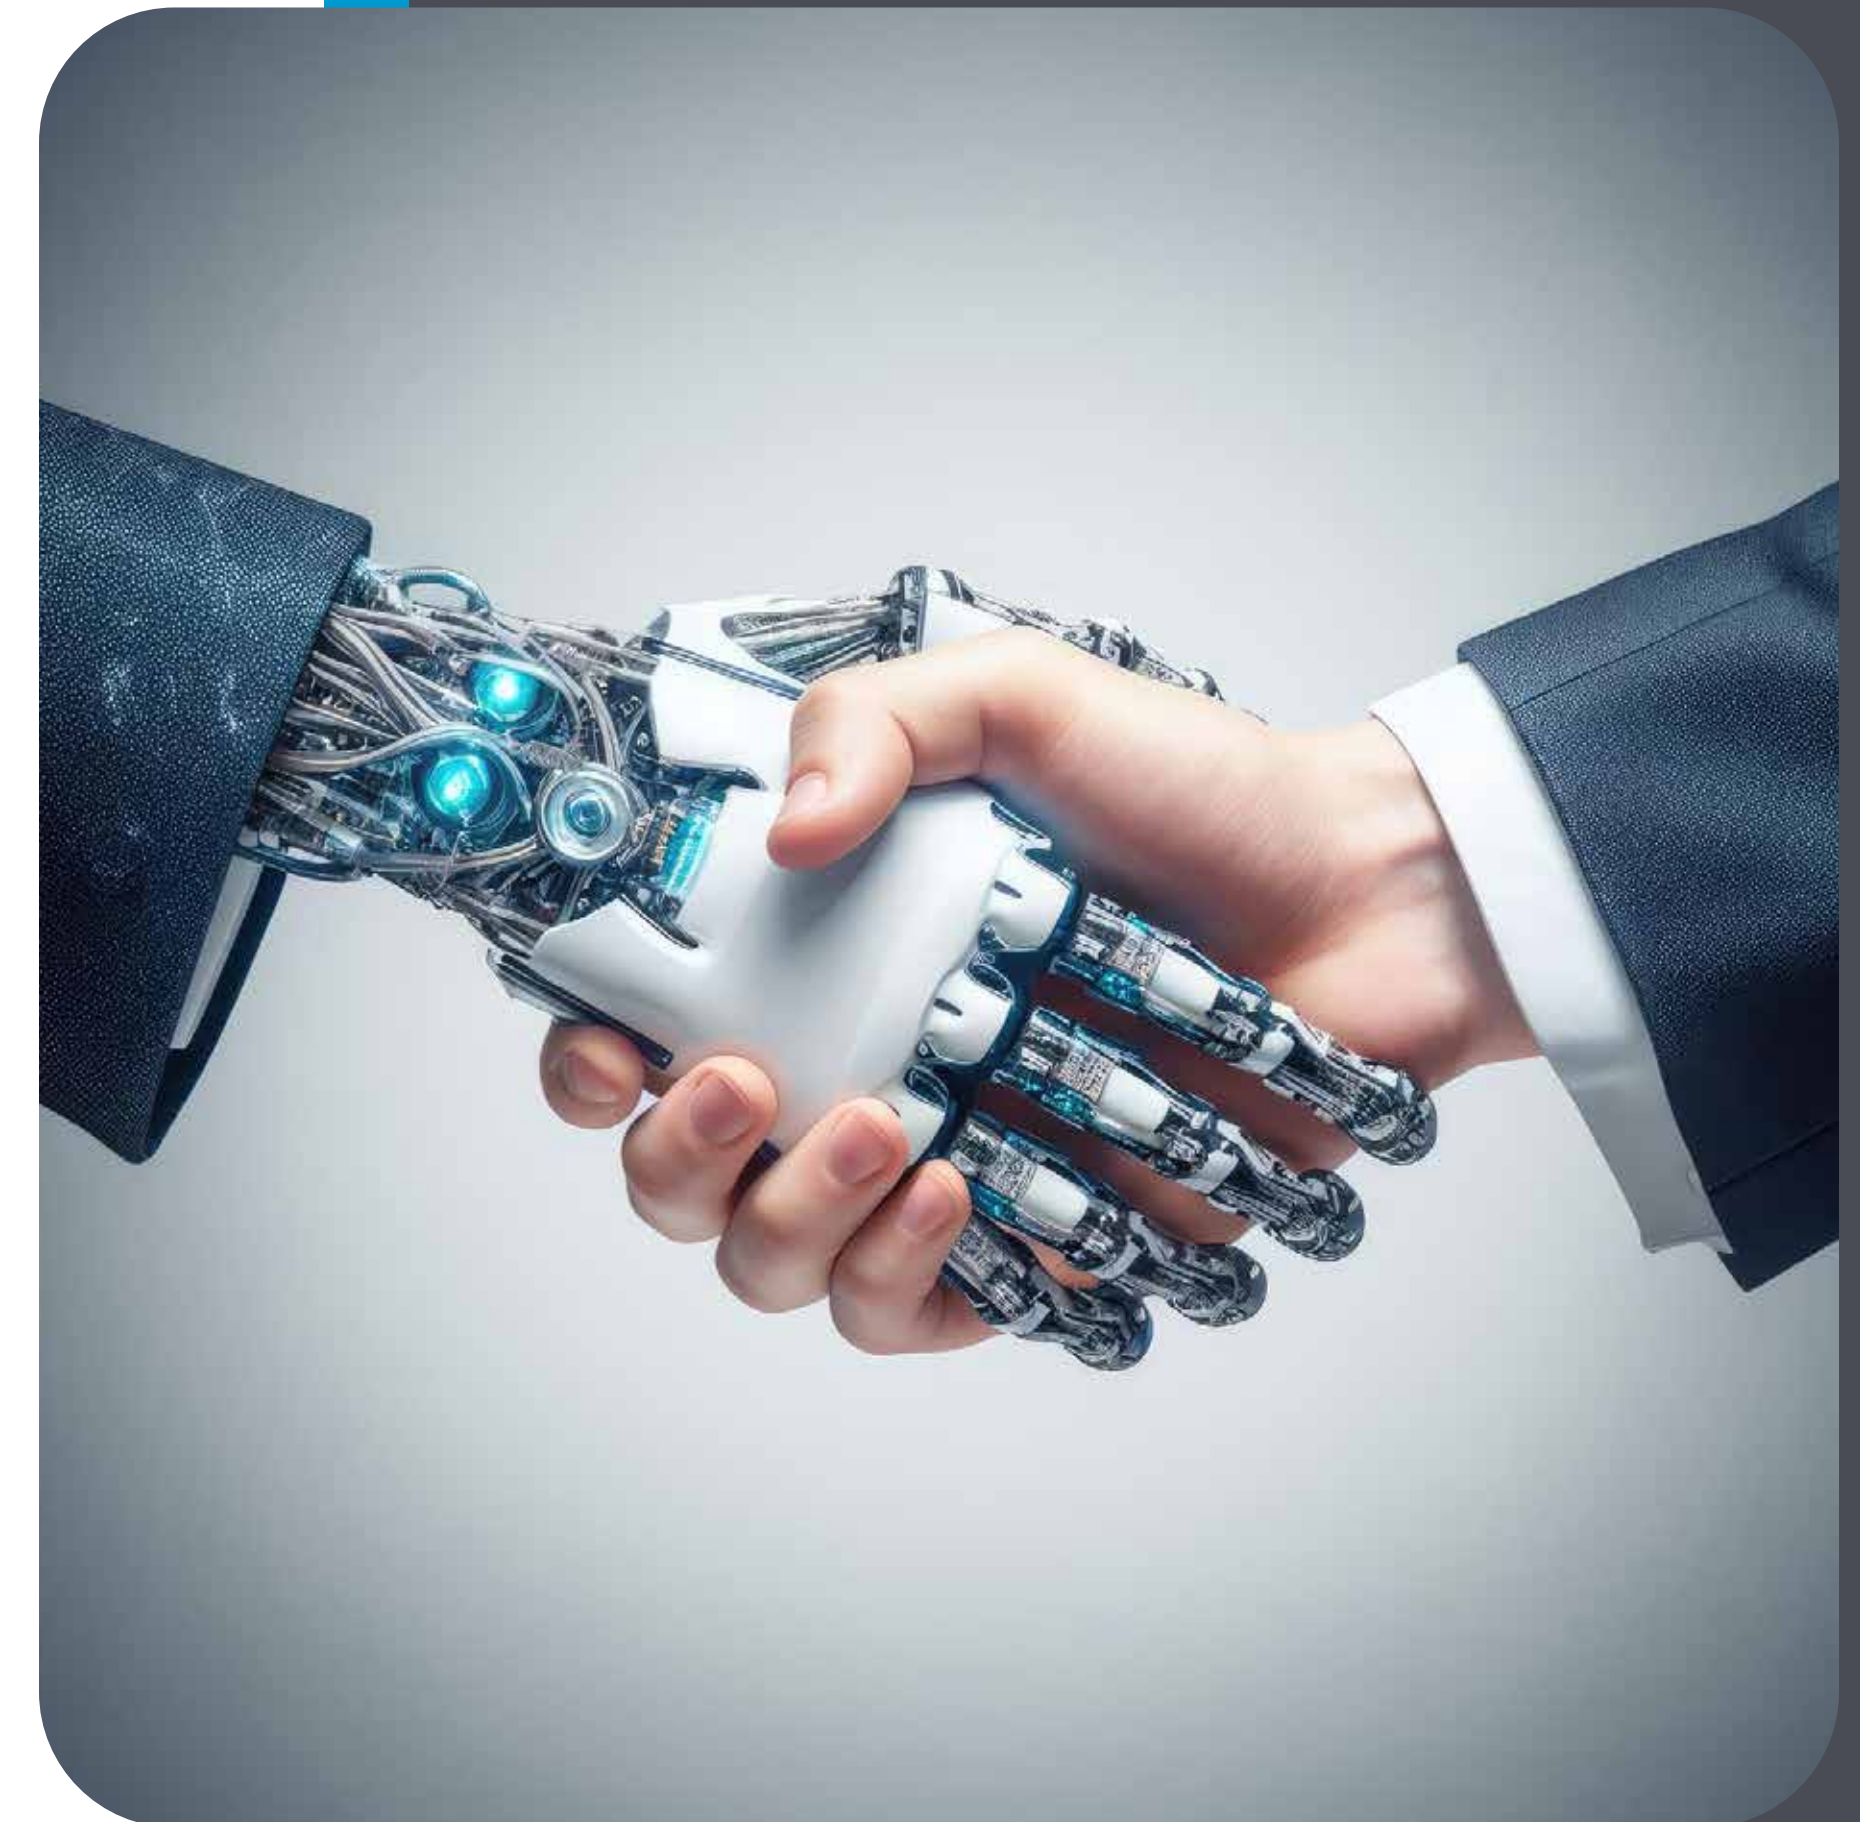

Learning Management System:

LMS is the one-stop destination for connecting to the program contents, video recordings of the classes, research repositories like IEEE, EBSCO and others, assignment submissions, connecting with mentors, etc.

The program office provides customized support in resume building, mock interviews, placements, career enhancement sessions, and more.

Our dedicated team of academicians, mentors, and researchers will provide support in designing and writing technical reports, publishing in reputed journals and conferences, etc. Various support sessions/webinars/special sessions will be held in addition to the regular session during evenings and weekends.

We conduct regular boot camps, workshops, and hackathons to help our participants to implement analytics projects or writing reports with hands-on support sessions.

Eligibility to Apply

Application Process and Program Fee

“ As more and more artificial intelligence is entering into the world,
more and more emotional intelligence must enter into leadership.
- Amit Ray ”

Application Process

Who Can Apply?

Candidates who aspire for a career transition to job roles such as AI Architect, AI Engineer, ML Expert, Data Scientist, Business Analyst, Data Engineer, etc., can apply to this one-of-a-kind 24-month Master’s program in AI. All candidates must demonstrate a passion to learn and a commitment to devote time.

- BCA/B.Sc. in IT/CS/Electronics or, B.Com/BBA equivalent with Computer Applications / Business Statistics / Mathematics or any Bachelor’s degree where they should have studied Mathematics or Statistics or any B.Tech/BE Degree including Mech, Civil, or, MCA, or MSc in IT/IS/CS
- With a minimum of 50% (45% in case of candidates belonging to SC and ST) marks in aggregate of any recognised university/institution or any other qualification recognised as equivalent thereto.

Selection is based on merit and interview. Candidates with 2-3 years of experience should appear for an entrance exam and subsequent interview.

Program Fee : INR 5.2 Lakhs

1st Year : INR 4.2 Lakhs

2nd Year : INR 1.0 Lakhs

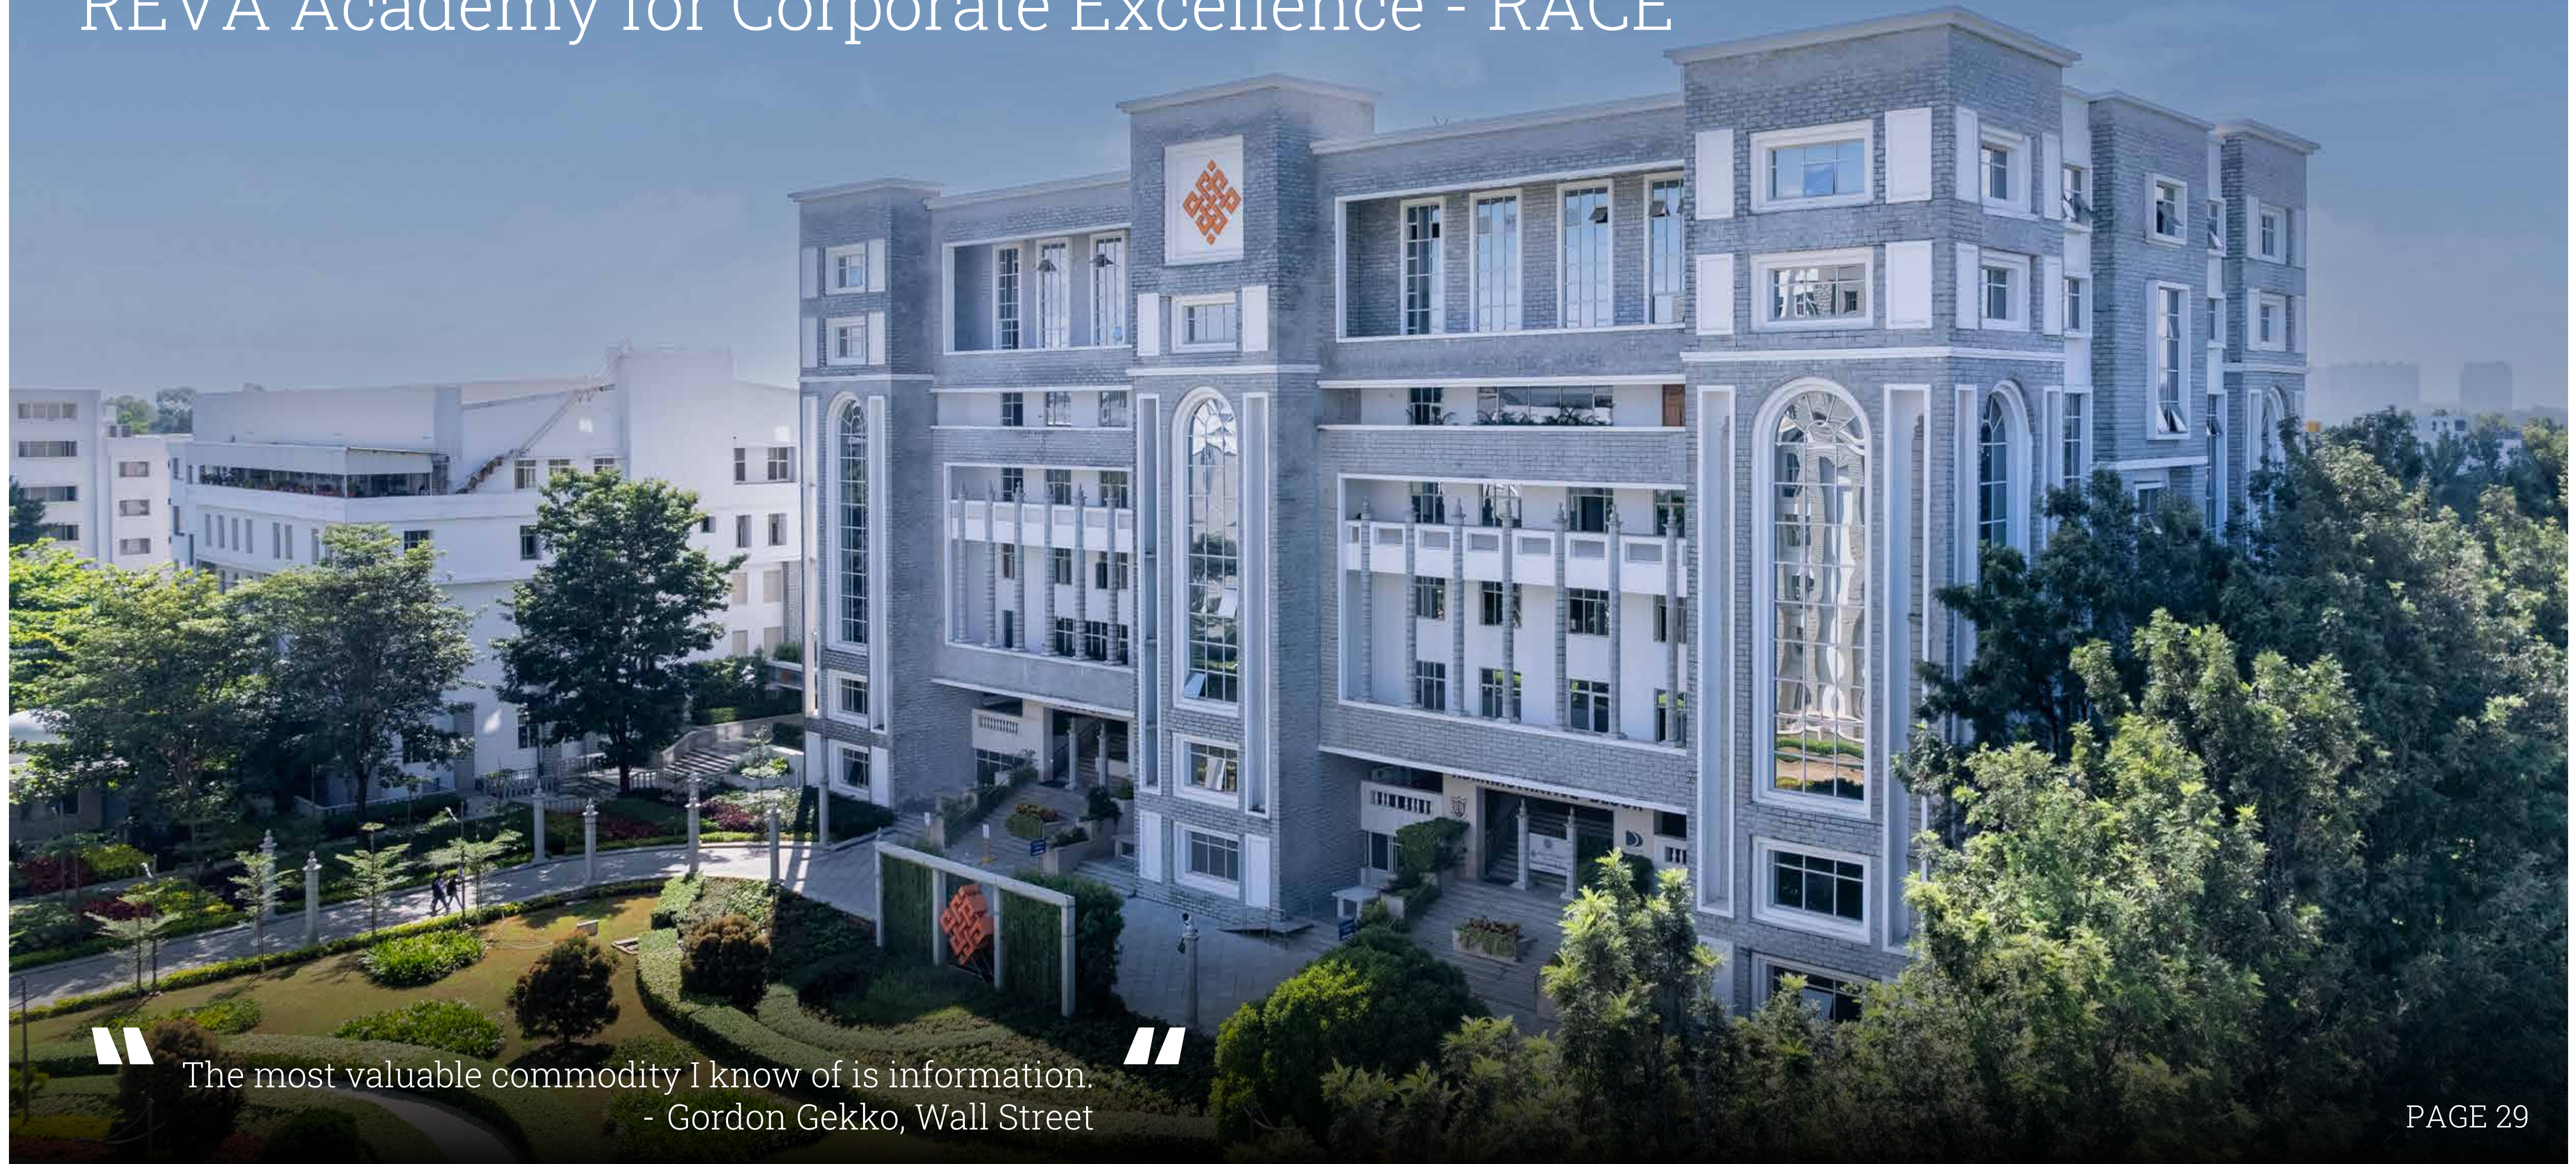

Easy EMI option for the payment of fee without hassle from our associated banks is available.

How to Apply

- [Click here](#) to apply for the program
- Fill in the details of the Registration Form and Register
- Pay Application Fee of INR 1,000 using preferred payment methods
- Fill in the application and submit

About REVA University and REVA Academy for Corporate Excellence - RACE

The most valuable commodity I know of is information.
- Gordon Gekko, Wall Street

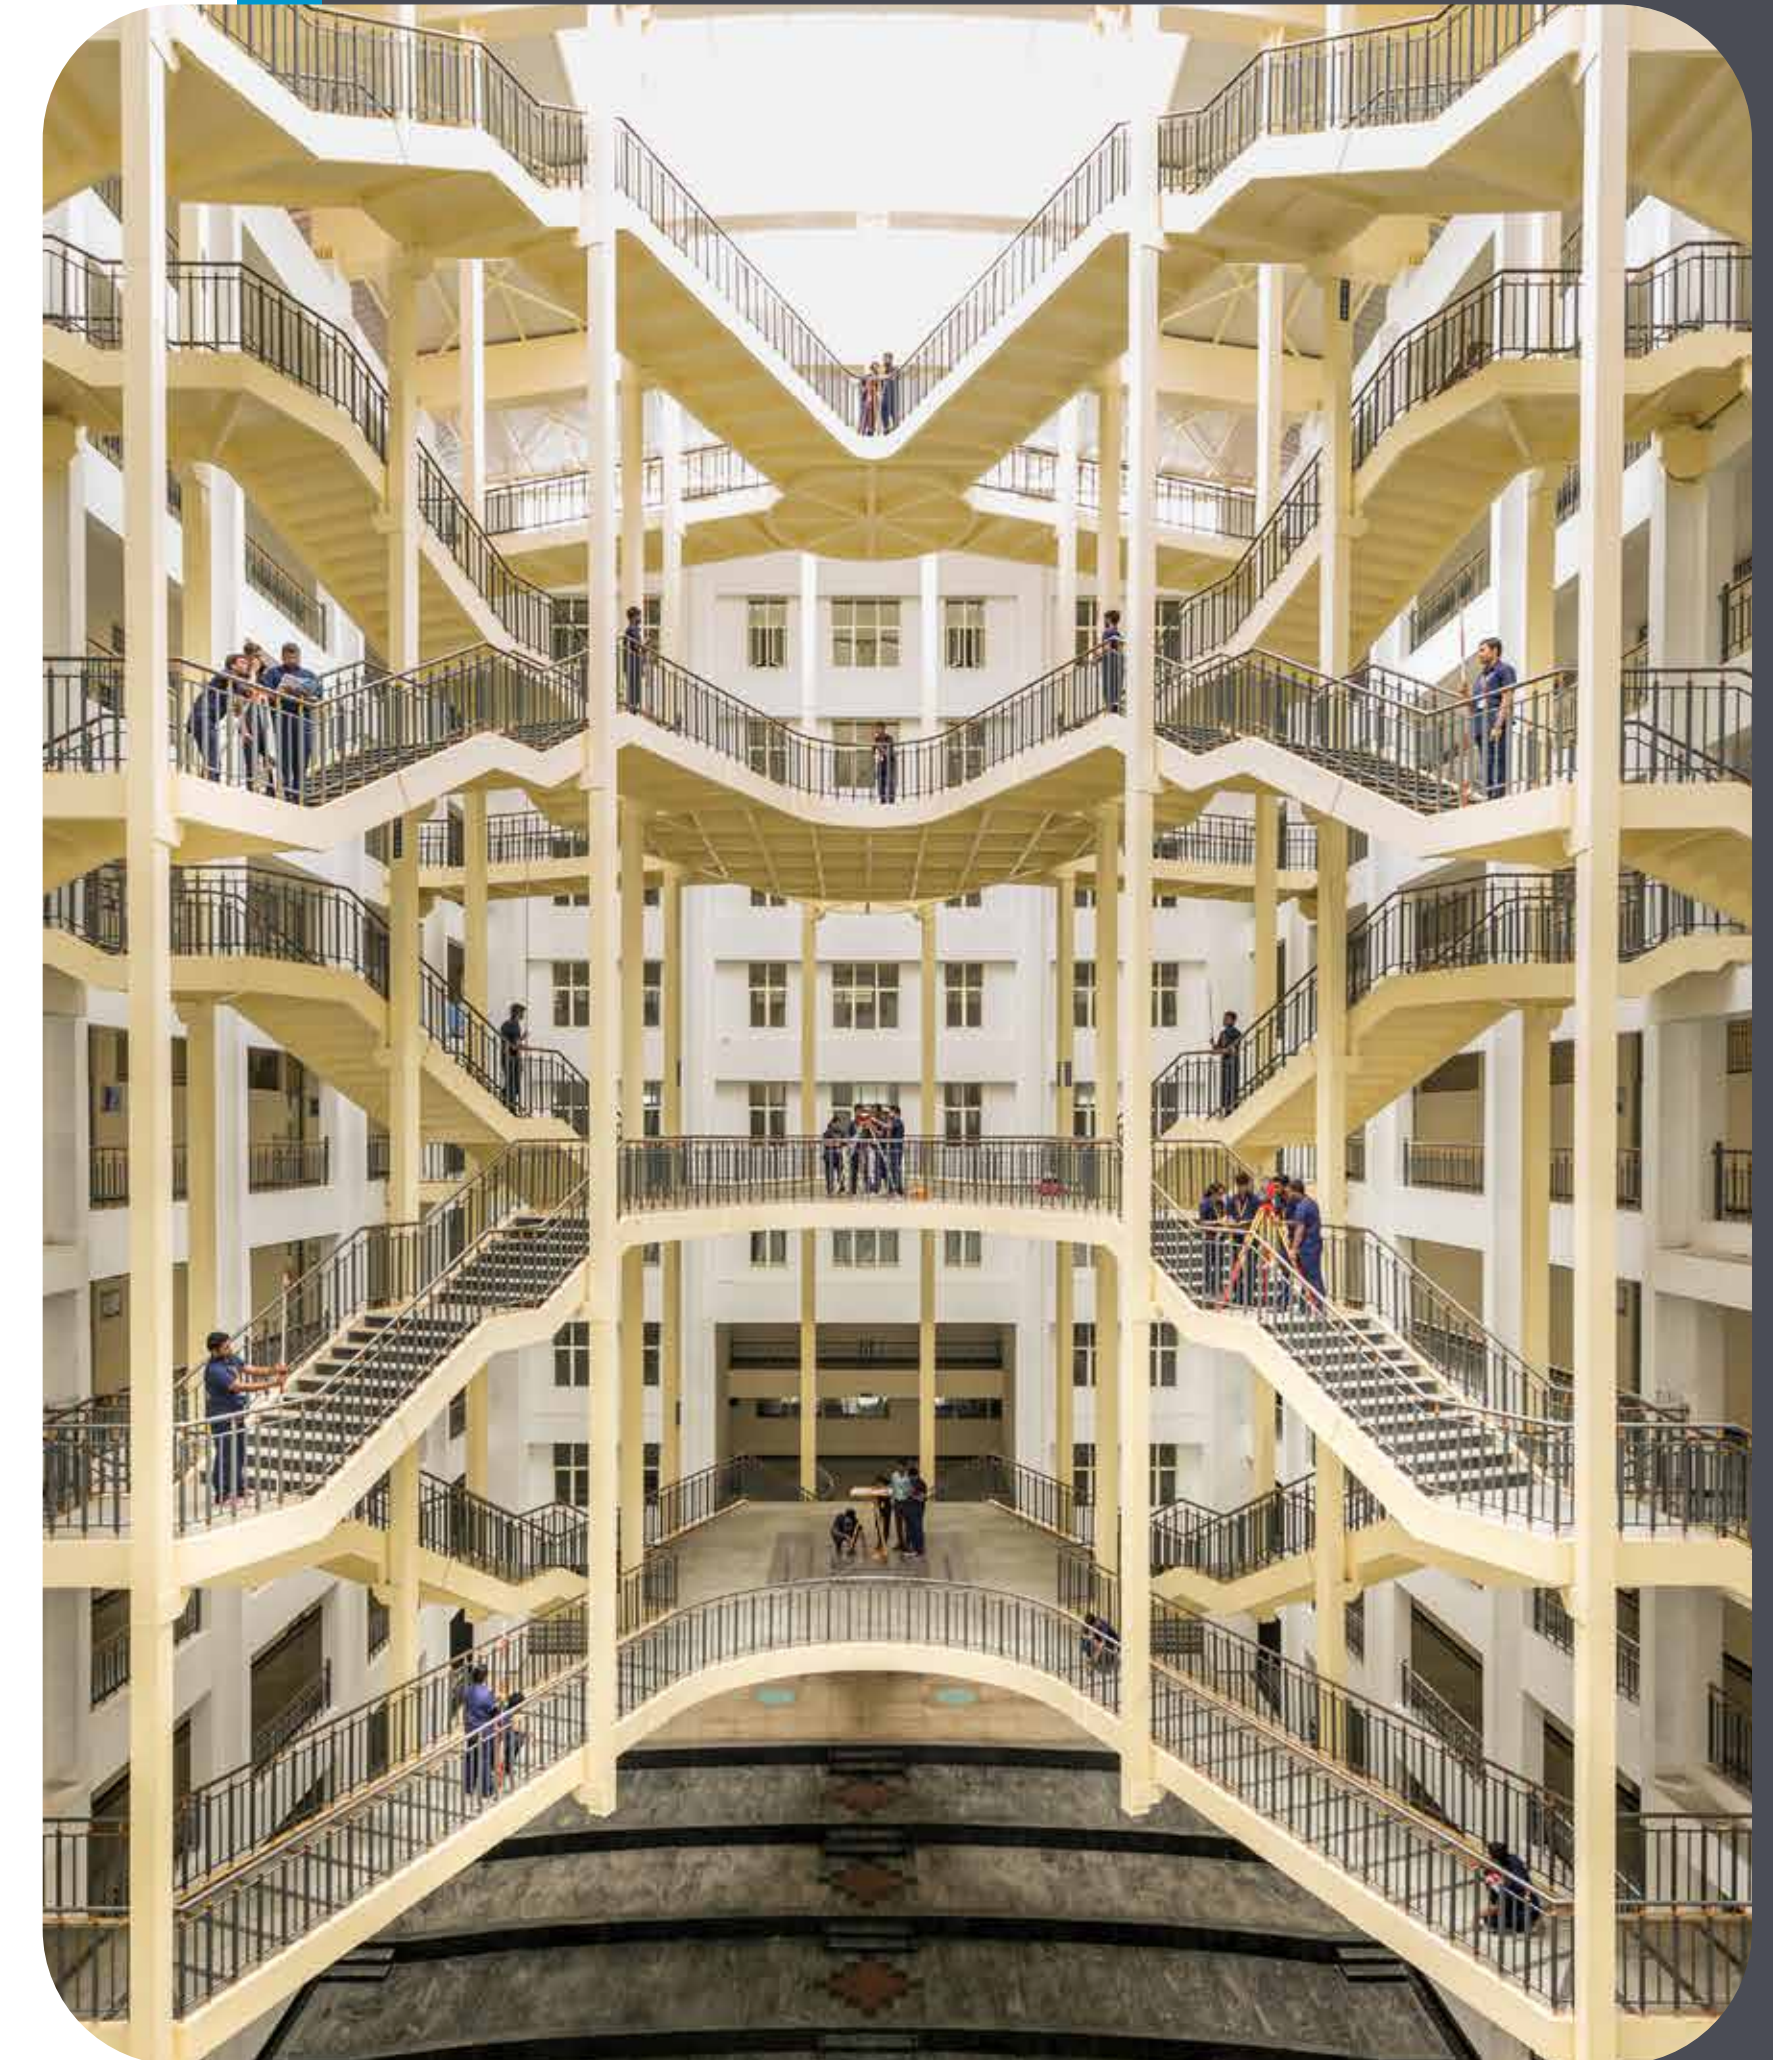

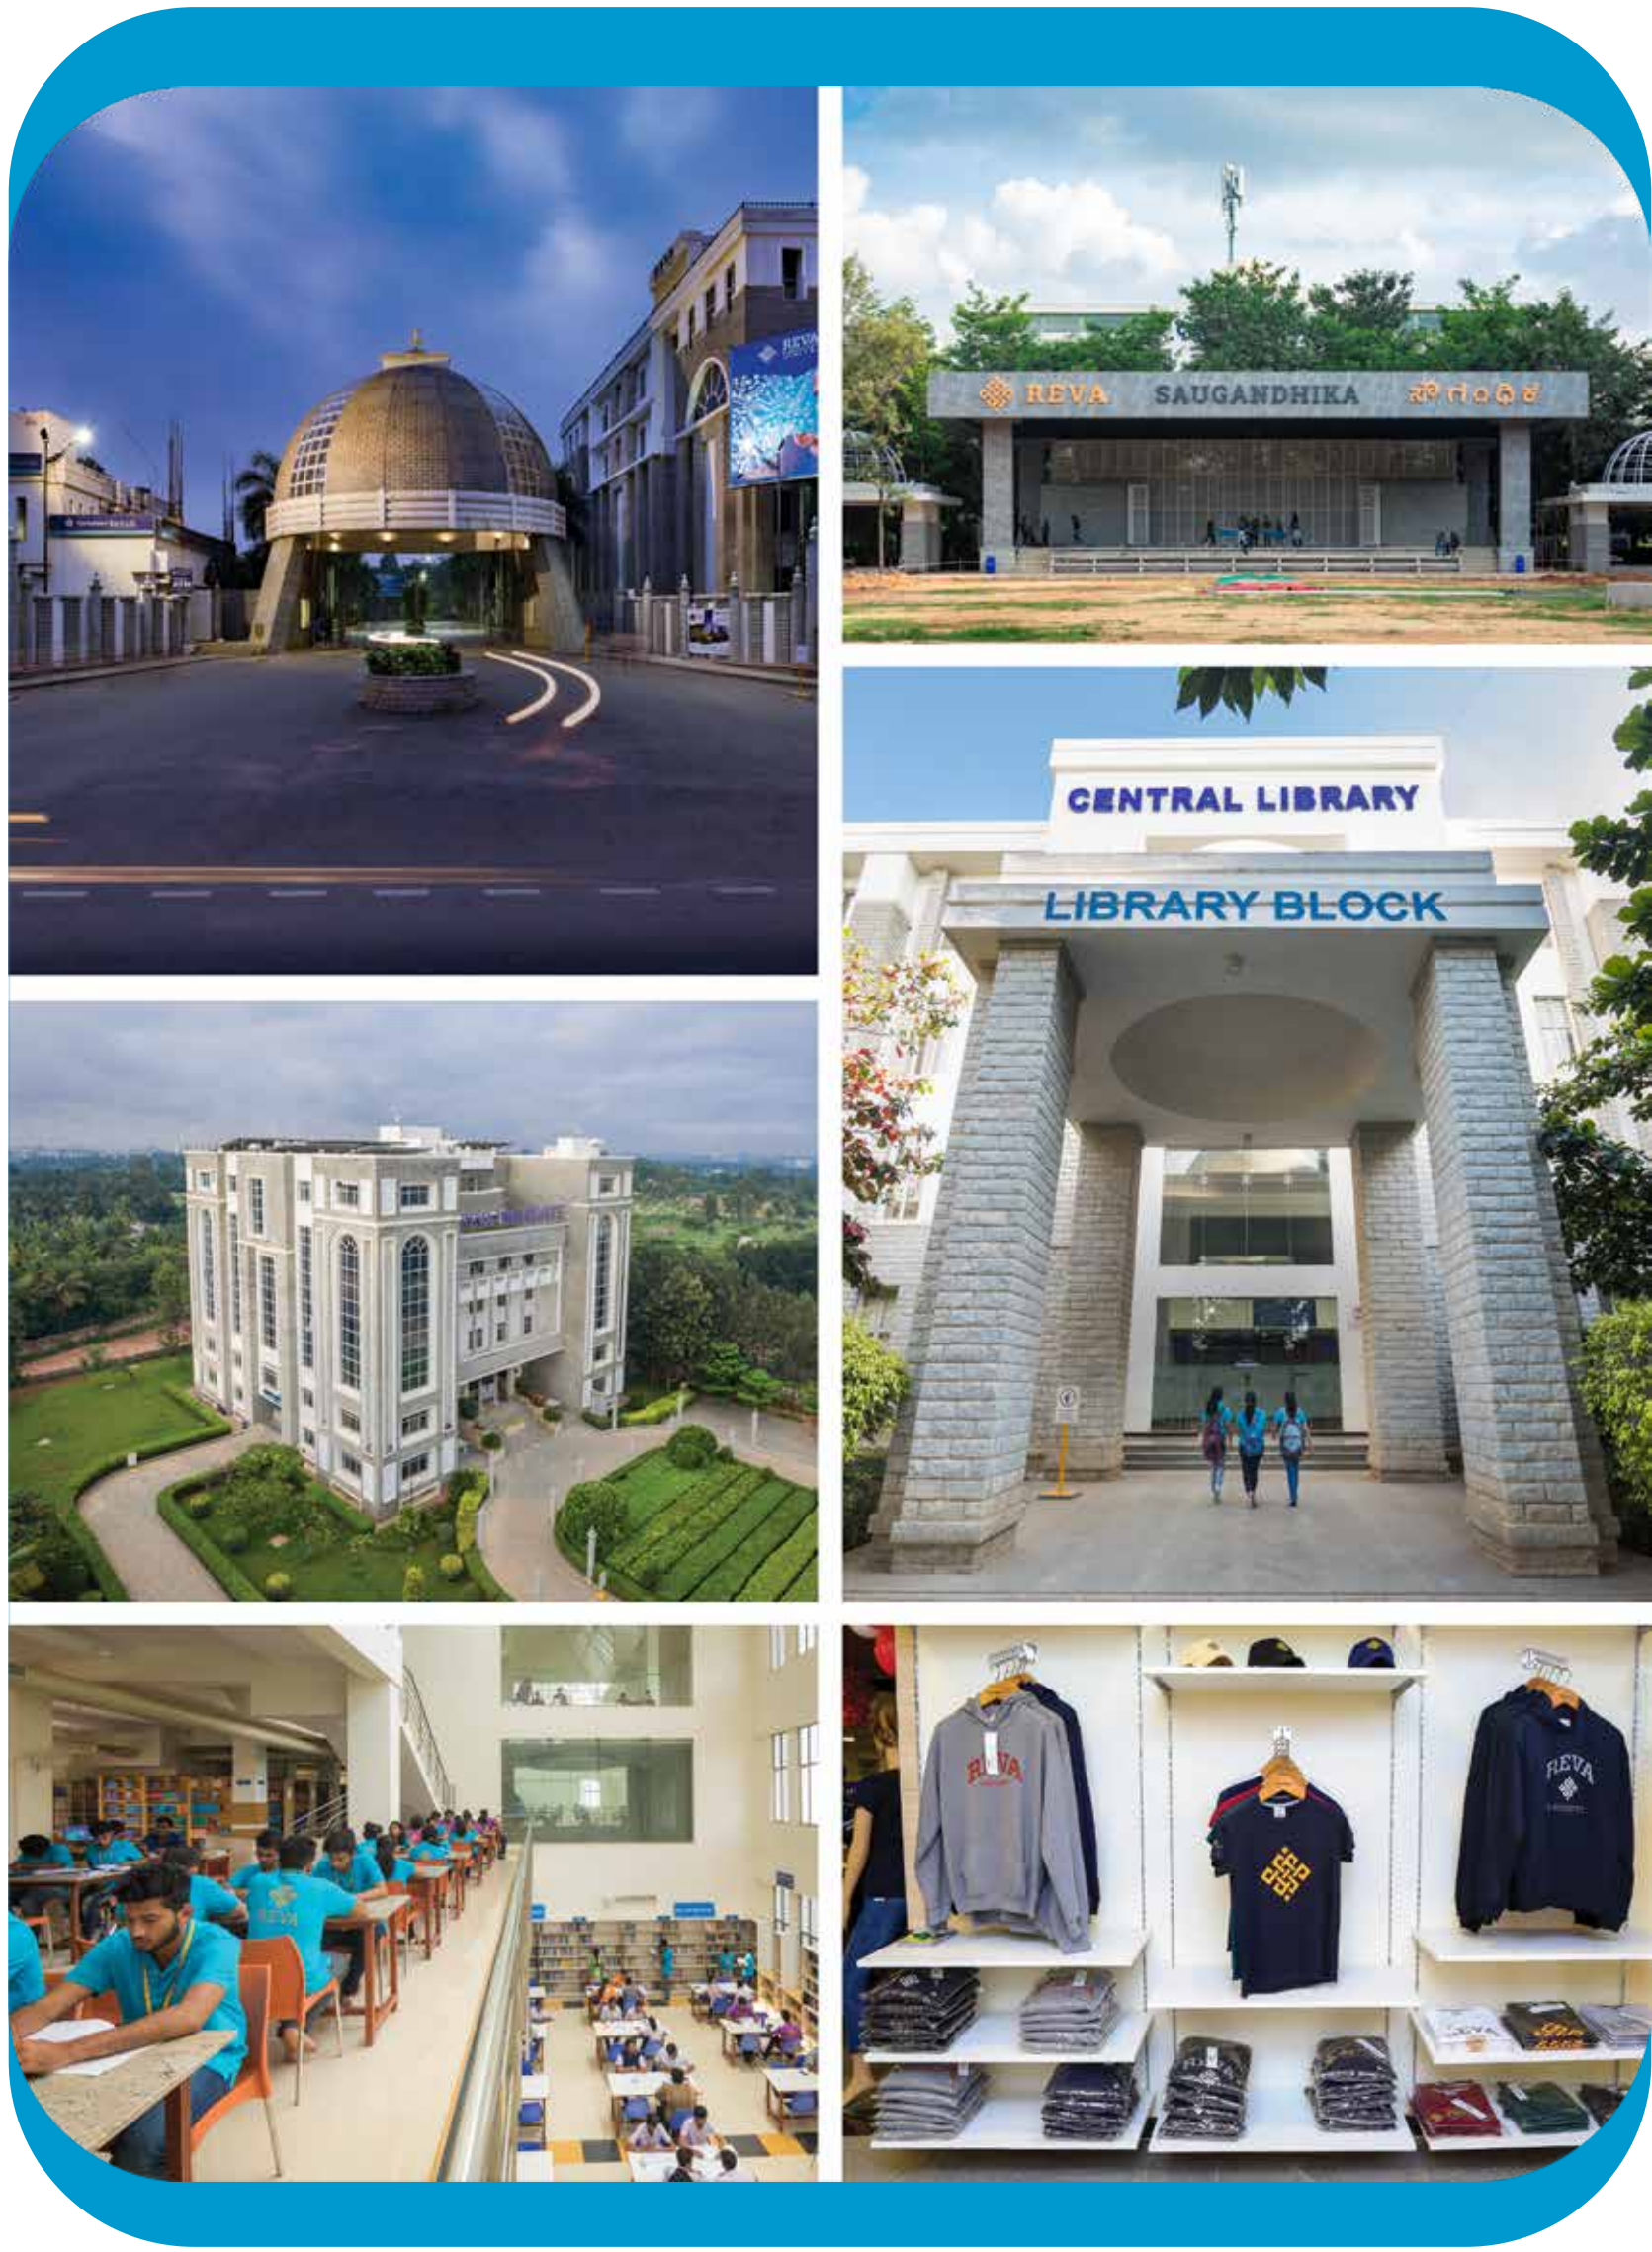

REVA University

REVA University has been established under the REVA University Act, 2012 with the vision to instil awareness, a zeal for higher learning and inquisitiveness in the minds of students through education. REVA University was conceptualised to bring change in the lives of students through the revisualisation of present academic scenario. The University breathes and practises an ideology that takes education to greater heights by motivating each learner. The Founder of REVA University believes in the adage 'Knowledge is Power'. Driven by this power of transforming lives, REVA succeeded in its educational endeavours by creating knowledge societies, imparting quality education and building responsible future generations.

REVA demonstrates a complete involvement in the field of education, which is complemented and enhanced by its verdant surroundings. The University retains a colossal landscape blanketed over 45+ acres of land, which is a standing testimony to inspire learners and smooth exchange of ideas. The University prides itself in contributing to the holistic development of every student.

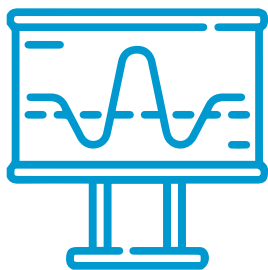

Currently, the REVA University offers 33 undergraduate programs, 23 full-time PG programs, 2 part-time PG programs in Engineering and Technology, Science, Commerce and Management, Architecture, Law and Humanities in addition to research degrees leading to M.Phil. and Ph.D. in different disciplines.

Facilities

Online library access with research repositories

State-of-the-art infrastructure and digital labs

2000 plus capacity digitally enhanced Auditorium

4000 plus capacity Open air theater

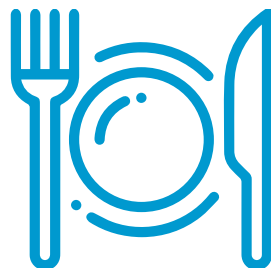

Guest house with 3-star facilities at the campus

Well equipped gym and sports facilities

Brand Store with REVA branded merchandise

Food court with variety of cuisines

REVA Academy for Corporate Excellence - RACE

REVA Academy for Corporate Excellence (RACE) aims to develop visionary enterprise leaders for corporates through progressive and integrated learning capabilities. RACE offers best in class, specialized, techno-functional and interdisciplinary programs designed to suit the needs of working professionals. The pedagogy of each program incorporates social and experiential learning to build transformative proficiencies in every participant.

Each of the programs is planned, designed and delivered by renowned corporate leaders and trainers and combines the latest tools, technologies and skill sets that are in sync with the futuristic demands of the industry. The programs follow a blended mode with lab-based training and 24/7 online support with a learning management system with certifications from REVA University and several industry partners.
